About Walchand College of Engineering...

Late Shri. Dhondumama
Sathe

Walchand College of Engineering, Sangli is one of the oldest and renowned technical institutes in Maharashtra. This college was started as a “New Engineering College” in the year 1947 by late Shri. Dhondumama Sathe. The College was renamed as “Walchand College of Engineering” in 1955, after a substantial financial support extended by Seth Walchand Hirachand Memorial Trust. The management and Control of the college was transferred to Administrative Council with all movable and immovable properties since 1956. It is one of the oldest Engineering colleges in the state of Maharashtra with 90 acres of land. The college now imparts education for AICTE recognized / approved diploma, degree, post graduate and Ph.D. courses in engineering. It was only Research Center in engineering till 2004.

The Autonomous Status has been awarded to the college by the Government of Maharashtra and UGC in the year 2007. UGC extended this Autonomy for second term in 2014 till 2020. We participated in the World Bank funded Government of India scheme, "TEQIP" (Technical Education Quality Improvement Program) Phase I project and we received second rank all over India, out of 127 national institutes, in its program impact assessment survey in 2010. WCE is successfully continued its journey in TEQIP phase II in upgrading the Post graduate and Research infrastructure. WCE has received Rs. 15.00 Crore. Now the Institute is selected for TEQIP Phase –III from April 2017-March 2020. In TEQIP-III Walchand College of Engineering, Sangli will partner with Jabalpur College of Engineering, Jabalpur to upgrade their status. Out of 18 Engineering Colleges from Maharashtra who were involved in TEQIP-II only 8 are now selected for TEQIP-III.

College is equipped with more than 800 Computers, state of art software, 380 MBPS fully functional (24X7) internet connectivity, and intranet with fiber optic backbone. In 2008-09 Seth WHM Trust donated a New Library building named as Ajit Gulabchand Central (AGC) Library with more than 1,00,000 volumes, more than 2000 international e-Journals, plus Hard copy journals (national and international), etc.

1. Dr. R. P. Hasabe:

Conference Details:

- Event: 3rd International Conference on Computational Modelling, Simulation and Optimization Phuket, THAILAND, June 14-16, 2024.
- Location: ANDAMANTRA RESORT & VILLA, Phuket Thailand.
- IEEE Conference Record Number: 61761
- Dates: June 14-16, 2024
- Paper Presentation : Dr. Ramchandra P. Hasabe

Topic: Influence of a Shunt Facts Devices on Distance Relay Using IEEE Bus System

Report:

3rd International Conference on Computational Modelling, Simulation and Optimization (ICCMO-2024) is being organized by Innovative Research Foundation (IRF) during June 14-16, 2024 at Phuket, THAILAND . ICCMO-2024 Phuket aims to provide a platform for researchers, engineers, academicians, and industry professionals from all over the world to present the research results, development and advanced activities in Engineering and Computational Sciences. The conference provides an opportunity for the delegates to exchange novel ideas and research findings in a face-to-face environment, establish business or research relationships, and find global partners for future collaboration.

Publications: All the accepted, registered and presented full-length papers of ICCMO-2024 will be published in the form of Proceedings by CPS which will be submitted to Xplore and CSDL for SCOPUS indexing. (<https://www.computer.org/conferences/cps>) Author(s) can also choose the registration with Abstract submission with a reduced fee for the presentation only.

Key Points Discussed:

Computational Intelligence, Design, Analysis and Applications of Optimization Algorithms, Deterministic, Dynamic, Stochastic, Robust and Combinatorial Optimization Models, Mathematical Modelling and Simulation CAD/CAE.

Conclusion: In this study, the adaptive distance protection technique is discussed. The wavelet transform is used to extract the features from the voltage and current waveforms. The neural network then receives the feature vector as input. The scheme's performance under different system factors and conditions was studied using simulation studies. On the other hand, even with the shunt compensator present in the fault loop, the relay functions properly when employing the suggested way. The tansig function was selected as the transfer function for the hidden layers I and II after a variety of possible combinations of transfer functions, including logsig, tansig, and linear functions, were analyzed. The pure linear function "Purelin" in the output layer yields satisfactory results.

Outcomes:

ICCMO-2024 Phuket aims to provide a platform for researchers, engineers, academicians, and industry professionals from all over the world to present the research results, development and advanced activities in Engineering and Computational Sciences. The conference provides an opportunity for the delegates to exchange novel ideas and research findings in a face-to-face environment, establish business or research relationships, and find global partners for future collaboration.
