CO-PO Mapping							
	Programme Outcomes (PO)						
	1	2	3	4	5	6	
CO1	1	1			3	2	
CO2	3			1	1	1	
CO3		2	2		2	1	
CO4	2					2	
The strength of mapping is to be written as 1,2,3; Where, 1:Low, 2:Medium, 3:High							
Each CO of the course must map to at least one PO.							

Assessment (for Theory Course)

The assessment is based on MSE, ISE and ESE.

MSE shall be typically on modules 1 to 3.

ISE shall be taken throughout the semester in the form of teacher's assessment. Mode of assessment can be field visit, assignments etc. and is expected to map at least one higher order PO.

ESE shall be on all modules with around 40% weightage on modules 1 to 3 and 60% weightage on modules 4 to 6.

Course Contents for F. Y. M. Tech. Control and Instrumentation Programme, Dept. of Electrical Engineering AY 2024-25

	Induction Motor Drives				
IV	Torque equation, Speed control methods for three phase cage induction motor, braking methods, stator voltage control induction motor drive, VSI fed induction motor drive, constant torque (constant E/F and constant V/F), constant HP operation, closed loop speed control block diagram, Various methods of speed control for slip ring induction motors.	6			
V	Synchronous Motor Drives and Brushless DC Motor Drives VSI fed synchronous motor drives, true synchronous and self-control mode, open loop and closed loop speed control of Permanent magnet synchronous machine, brushless DC motor drives.	6			
	Special Drives				
VI	Construction and operating principle of switched reluctance motors, Current / Voltage control, torque equation, converter circuits, operating modes and applications of switched reluctance motors. Solar panel VI characteristics, solar powered pump, maximum power point tracking and battery-operated vehicles.	6

111	 Transport and communication: a) In plants: xylem and phloem; in animals: blood andlymph. transport of gases, cell-cell communication Defence mechanism in plants and animals. Immunological concepts- antigen, antibody, humoral and cell mediated immune system, cells and organs of immune system, vaccines. 	7
IV	 Techniques and devices: a) introduction to Recombinant DNA Technology, Monoclonal antibodies, fermentation technology, plantand animal tissue culture Techniques and instruments of analysis- microscope, centrifuge, electrophoresis, chromatography, tracer techniques and biomedical instruments. 	7
V	 Trends in Bioengineering: a) Introduction to Microbiology and nanotechnology: diagnostics and therapeutics, Biocomputing, bioinstrumentation, bioimaging and biosensors Biomimatics: nature inspired designs and processes 	6
VI	 Future scope and ethics: a) Future of biotechnology associated with engineers- medical, agricultural and environmental perspectives Ethics in bioengineering. 	6

CO-PO Mapping														
	Programme Outcomes (PO)										PSO			
	1	2	3	4	5	6	7	8	9	10	11	12	1	2
CO1	3													
CO2	3													
CO3	3													
CO4	3													
The stren	The strength of mapping is to be written as 1: Low, 2: Medium, 3: High													
Each CO c	of the co	ourse n	nust ma	ap to at	t least o	one PO.								
The streng Each CO c	gth of r of the c	nappin ourse n	g is to l nust ma	be writ ap to at	ten as 1 t least o	1: Low, one PO.	2: Med	ium, 3:	High					

The assessment is based on MSE, ISE and ESE.

MSE shall be typically on modules 1 to 3.

ISE shall be taken throughout the semester in the form of teacher's assessment. Mode of assessment can be field visit, assignments, surprise or declared test etc.

ESE shall be on all modules with around 40% weightage on modules 1 to 3 and 60% weightage on modules 4 to 6.
