

Walchand College of Engineering, Sangli

(Government Aided Autonomous Institute)

AY 2024-25

Course Information

| | |
|----------------------------|--|
| Programme | B. Tech. (Civil Engineering) |
| Class, Semester | Second Year B. Tech., Sem. III |
| Course Code | 7CV201 |
| Course Name | Fluid Mechanics |
| Desired Requisites: | Engineering Physics, Engineering Mechanics and Mathematics |

| Teaching Scheme | | Examination Scheme (Marks) | | | |
|--------------------|-------------|----------------------------|------------|------------|--------------|
| Lecture | 03 Hrs/week | MSE | ISE | ESE | Total |
| Tutorial | - | 30 | 20 | 50 | 100 |
| Practical | - | | | | |
| Interaction | - | Credits: 03 | | | |

Course Objectives

| | |
|---|---|
| 1 | To provide fundamentals of fluid mechanics. |
| 2 | To impart the necessary knowledge on pipe flow hydraulics and its applications. |
| 3 | To impart knowledge of boundary layer theory and hydraulic machines. |
| 4 | To prepare for higher studies and research in the field of fluid mechanics. |

Course Outcomes (CO)

| CO | Description | Blooms Taxonomy | |
|-----|---|-----------------|-------|
| | | Descriptor | Level |
| CO1 | <i>Explain</i> the fundamentals of fluid mechanics, hydraulic machines and boundary layer theory. | Understand | II |
| CO2 | <i>Solve</i> problems on fluid statics and dynamics | Apply | III |
| CO3 | <i>Use</i> boundary layer theory in different fields. | Apply | III |
| CO4 | <i>Estimate</i> the different losses in pipe flow and efficiencies of hydraulic machines. | Apply | III |

| Module | Module Contents | Hrs |
|--------|---|-----|
| I | Fluid Properties and Statics: Scope and Importance of Fluid Mechanics, Physical Properties: density, specific weight, specific volume, specific gravity, dynamic and kinematic viscosity, compressibility, surface tension and capillarity and Vapor pressure. The basic equation of hydrostatics, Pascal's law, Concept of pressure head, datum, absolute and gauge pressure, Measurement of pressure, Application of the basic equation of hydrostatics. Principle of floatation and Buoyancy, Equilibrium of floating bodies, Stability of floating bodies. | 8 |
| II | Fluid Kinematics: Introduction of basic terms: Path line, streak line, stream line and stream tube, Velocity and acceleration of fluid particle. Types of flow: steady and unsteady, uniform and non-uniform, Laminar and Turbulent, one, two, three-dimensional flow, rotational and irrotational flow. Flow net: Equation of stream line and equipotential line, methods of developing the flow net and its uses | 6 |
| III | Fluid Dynamics: Forces acting on fluid mass in motion, Euler's equation of the motion along a streamline, Bernoulli's equation: assumptions, applications and its limitations. Momentum equation and its application in fluid mechanics. Applications of Bernoulli's Equation: Analysis of the hydraulic coefficients for the discharge measuring devices: orifices, mouthpieces, venturimeter, pitot tube, notches and weirs. Analysis of losses in closed and open channel flow. | 6 |

| | | |
|----|---|----|
| IV | <p>Flow in Pipes: Laminar Flow: Reynold's Experiment, laminar flow through the fixed parallel plate, Couette's flow and Hazen Poisselle's equation for circular pipes.</p> <p>Turbulent Flow: Velocity distribution and shear stresses in turbulent flow, Nikuradse's experiments, Elementary concepts of turbulent flow in smooth and rough pipes.</p> <p>Losses in Pipes: Losses in Pipes: Darcy Weisbach equation and minor losses in flow through pipe, Concept of equivalent length of pipe and diameter of pipe.</p> <p>Analysis of losses in pipe for the pipes connected in series, parallel and Siphon. Solving the two reservoir problem, three-reservoir problem and Pipe Network analysis.</p> | 10 |
| V | <p>Boundary Layer Theory: Concept of boundary layer, Development of boundary layer on a flat plate, different thickness. Drag and lift of submerged bodies, Hydro dynamically smooth and rough boundaries, Boundary layer separation and its control.</p> | 5 |
| VI | <p>Pump and Turbine:</p> <p>Centrifugal pump: type, component parts and working of pump.</p> <p>Pelton wheel turbine: type, working and principle of Pelton wheel turbine.</p> | 5 |

CO-PO Mapping

| COs | Programme Outcomes (PO) | | | | | | | | | | | | PSO | |
|-----|-------------------------|---|---|---|---|---|---|---|---|----|----|----|-----|---|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 1 | 2 |
| CO1 | 2 | | | | | | | | | | | | 2 | 2 |
| CO2 | | 3 | | | | | | | | | | | 2 | 2 |
| CO3 | | 3 | | | | | | | | | | | 2 | 2 |
| CO4 | | 2 | | | | | | | | | | | 2 | 2 |

The strength of mapping: - 1: Low, 2: Medium, 3: High

Assessment

- The assessment is based on MSE, ISE, and ESE.
- MSE shall be typically on modules 1 to 3.
- ISE shall be taken throughout the semester in the form of a teacher's assessment. The mode of assessment can be field visits, assignments, etc., and is expected to map at least one higher-order PO.
- ESE shall be on all modules with around 25-30% weightage on modules 1 to 3 and 70-75% weightage on modules 4 to 6.
- For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed, and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)

| AY 2024-25 | | | | | |
| Course Information | | | | | |
| Programme | B. Tech. (Civil Engineering) | | | | |
| Class, Semester | Second Year B. Tech, Sem III | | | | |
| Course Code | 7CV202 | | | | |
| Course Name | Engineering Surveying | | | | |
| Desired Requisites: | - | | | | |
| Teaching Scheme | | Examination Scheme (Marks) | | | |
| Lecture | 3 Hrs/week | MSE | ISE | ESE | Total |
| Tutorial | - | 30 | 20 | 50 | 100 |
| Practical | - | | | | |
| Interaction | - | Credits: 3 | | | |
| Course Objectives | | | | | |
| 1 | To impart basic principles of conventional surveying through class instructions. | | | | |
| 2 | To develop a basic understanding of computations made in topographic mapping, and land Surveys. | | | | |
| 3 | To develop an ability to analyze land profiles in a logical manner and will be able to apply well-understood principles in planning and design of engineering structures on the Earth's surface. | | | | |
| Course Outcomes (CO) | | | | | |
| CO | Description | Blooms Taxonomy | | | |
| | | Descriptor | Level | | |
| CO1 | Identify Surveying techniques to work in a team to collect the topographical data with due consideration to errors and blunders. | Remembering | I | | |
| CO2 | Apply their knowledge to evaluate alternate surveying techniques suitable for the scope of the project and site situation. | Applying | III | | |
| CO3 | Perceive modern surveying equipment and techniques for land surveying. | Understanding | II | | |
| Module | Module Contents | | | | Hrs |
| I | Introduction to Land Survey Systems | | | | 6 |
| | Basic measurements in surveying, Application of land survey techniques in Civil engineering works, Historical development of surveying, Brief review of basic classification, principles and variety of drawings, Phases and stages of surveying, Types of measurements and range of minor and major instrumentation, Traversing & Trilateration, Accuracy and Precision in Survey measurements, probable errors in measurements | | | | |
| II | Linear measurement of distances and Compass surveying | | | | 6 |
| | Concept of horizontal control, Selection of stations for surveying, Methods and equipment for horizontal distance measurement and offsetting, obstacles in measurement, errors and corrections, Chain survey with triangulation, and offsets, the concept of well-conditioned triangle, plotting of chain survey Need of compass in surveying, Construction and use of Prismatic compass, Bearings, Magnetic Declination, local attraction and corrections, Chain and compass traversing – fieldwork, computations and plotting | | | | |
| III | Levelling, Contouring; and Precise Levelling | | | | 7 |
| | Concept of vertical control, Methods and equipment for levelling, construction, use, and adjustments of levelling equipment, reduction of levels, Plotting of cross sections and profiles, sensitivity of level tube, Reciprocal levelling, Curvature and refraction corrections, Contouring methods, types, characteristics and use of contour maps, Precise levelling need, instrumentation and methods | | | | |

| | | |
|----|--|---|
| IV | Theodolite Surveying Vernier Theodolite construction, applications for horizontal and vertical angle measurement, Permanent adjustments, Applications for lineout, lining in, locations of intersections, establishing line beyond control, etc., Theodolite traverse – fieldwork, computations, use of transit rule, Bowditch rule, Gales traverse table and plotting, Checks in open and closed traverse, omitted measurements, errors and precautions, Stadia tacheometry and trigonometrical levelling | 8 |
| V | Plane Table survey Conventional plane table construction, use, accessories, setting up, orientation, fieldwork and limitations, use for direct contouring | 6 |
| VI | Use of modern tools in Project Surveying Detailed project surveys, Horizontal Control, Vertical Control, Methods for Location, Survey for Route, Bridge, Dam, Reservoir and Tunnel; Overview of system functions and applications; of EDM and digital instrumentation like Aerial, Remote Sensing, GIS, GPS, LIDAR, 3D Scanner, Fundamental parameters for calculation, correction factors and constants; data retrieval and processing | 7 |

| Course Information | | | | | |
| Programme | B. Tech. (Civil Engineering) | | | | |
| Class, Semester | Second Year B.Tech., III Semester | | | | |
| Course Code | 7CV203 | | | | |
| Course Name | Building Materials and Technologies | | | | |
| Desired Requisites: | Civil Engineering Infrastructure -7CV101 | | | | |
| Teaching Scheme | | Examination Scheme (Marks) | | | |
| Lecture | 3 Hrs/week | MSE | ISE | ESE | Total |
| Tutorial | - | 30 | 20 | 50 | 100 |
| Practical | - | | | | |
| Interaction | - | Credits: 3 | | | |
| Course Objectives | | | | | |
| 1 | Impart in-depth knowledge of the various materials and techniques in Building Construction. | | | | |
| 2 | Articulate the role played by various building components and their interactions for an integrated behaviour of the building as a whole. | | | | |
| 3 | Establish the representation of building components in terms of sketches and drawings. | | | | |
| Course Outcomes (CO) | | | | | |
| CO | Description | Blooms Taxonomy | | | |
| | | Descriptor | Level | | |
| CO1 | Distinguish the strengths and weaknesses of various building materials by assessment and comparison of quality parameters as per IS codes. | Understand | 2 | | |
| CO2 | Interpret applications of various materials in building components in the context of strength and durability parameters. | Apply | 2 | | |
| CO3 | Classify the various components and their relationships in buildings with different structural systems. | Apply | 3 | | |
| CO4 | Assign the materials and construction techniques to be adopted based on different structural systems. | Apply | 3 | | |
| CO5 | Illustrate the various building components in terms of scaled engineering drawings. | Apply | 3 | | |
| Module | Module Contents | | | Hours | |
| I | Introduction to Building Systems: The need for buildings, Structural systems; Load bearing, Framed, Prefabrication, Pre Engineered Construction, Types of Loads on Building, Buildings Components and their functions, Stresses in Building Components, General properties of materials and their role in Construction, Sustainability in Construction, Energy Efficiency in buildings. | | | 7 | |
| II | Building Materials – Properties and Applications: General properties of materials, Origin, types, Qualitative parameters, Engineering properties and Applications of important building materials ; Stone, Brick, Lime, Cement, Mortar/s, Steel, Specifications as per IS codes. | | | 6 | |
| III | Foundations, Walls and Columns: Foundations: Definition and Functions, Structural Requirements, Bearing Capacity of Soils, Materials used and their properties, Types of Shallow and Deep foundations, Conditions for their applications, Plinth and Plinth Beams. Walls and Columns: Structural and Functional requirements, Types of Units and Mortars and their properties, Factors affecting strength and stability of walls, Functions of wall in buildings, Brick masonry bonds, Concrete Block masonry, Cavity walls, Function and types of columns. | | | 7 | |

| | | |
|----|---|---|
| IV | Openings in Buildings: Physical and Functional roles of Openings, Materials Involved, Criteria for sizes of Openings, Functional types of Doors, Windows, Ventilators. Openings vs. Internal Comfort, Role of Lintel and Chajja. Staircases- Ideal Characteristics, types, Functional Design criteria. | 6 |
| V | Roofs and Floors: Definitions, Accessible and Inaccessible roofs, Structural and functional requirements, Load considerations, Types of Sloped roofs, Roof covering materials, Types of Flat roof/floor, Types of RC slabs, Role of concrete and steel reinforcement, Formwork, Joints in construction. | 6 |
| VI | Building Services and Finishes: Types and requirements of Building Services, Plumbing for water supply and sanitation, Electrification. Types of Finishes for Wall, Floor, Roof, Ceilings. Types of Paints and their applications, Defects in finishes. | 7 |

| Course Objectives | | | | | |
| 1 | To provide hands-on experience in conducting experiments to measure fundamental properties of fluids such as density, viscosity, and surface tension. | | | | |
| 2 | To develop proficiency in using laboratory equipment and instruments for fluid mechanics measurements, such as flow meters, pressure gauges, and manometers. | | | | |
| 3 | To provide hands-on practice to conduct experiments for study of pipe flow. | | | | |
| 4 | To develop the analytical skills required for interpretation and analysis. | | | | |
| Course Outcomes (CO) | | | | | |
| CO | Description | | | Blooms Taxonomy | |
| | At the end of the course, the students will be able to, | | | Descriptor | Level |
| CO1 | <i>Interpret</i> properties of fluids such as density, viscosity, and surface tension. | | | Apply | III |
| CO2 | <i>Use</i> laboratory equipment and instruments for fluid mechanics measurements, such as flow meters, pressure gauges, and manometers. | | | Apply | III |
| CO3 | <i>Practice</i> experiments for the study of pipe flow. | | | Apply | III |
| CO4 | <i>Estimate</i> performance of Pump and turbine. | | | Apply | III |
| List of Experiments / Lab Activities | | | | | |
| List of Experiments: | | | | | |
| <ol style="list-style-type: none"> 1. Determination of viscosity of oil by using a Redwood viscometer 2. Determination of metacentric height of ship model 3. Development of Flow net by using the electrical analogy method 4. Verification of Bernoulli's theorem for the energy equation 5. Verification of momentum equation by using the impact of jet on a circular disc 6. Measurement of discharge by using sharp edged circular orifice and Venturimeter 7. Study of different types of flow by using the Reynolds experiment 8. Measurement and calculation of minor losses are due to entrance, exit, expansion of flow, 9. contraction of flow, elbow, bent and valve 10. Measurement of Loss of head for the pipe flow by using differential U-tube Manometer 11. Study of characteristics of Centrifugal Pump and Pelton Wheel Turbine under constant speed. | | | | | |

| Assessment | | | | |
|---|-------------------------------------|--------------------|---|-------|
| There are three components of lab assessment, LA1, LA2, and Lab ESE | | | | |
| IMP: Lab ESE is a separate head of passing. Lab ESE is treated as End Semester Exam and is based on all experiments/lab activities. | | | | |
| Assessment | Based on | Conducted by | Typical Schedule | Marks |
| LA1 | Lab activities, attendance, journal | Lab Course Faculty | During Week 1 to Week 6 Marks Submission at the end of Week 6 | 30 |
| LA2 | Lab activities, attendance, journal | Lab Course Faculty | During Week 7 to Week 12 Marks Submission at the end of Week 12 | 30 |
| Lab ESE | Lab Performance and documentation | Lab Course faculty | During Week 13 to Week 18 Marks Submission at the end of Week 18 | 40 |
| Week 1 indicates the starting week of a semester. The actual schedule shall be as per the academic calendar. Lab activities/Lab performance shall include performing experiments, mini-projects, presentations, drawings, programming and other suitable activities, as per the nature and requirement of the lab course. The experimental lab shall have typically 8-10 experiments. | | | | |

Walchand College of Engineering, Sangli

(Government Aided Autonomous Institute)

AY 2022-23

Course Information

| | |
|---------------------|----------------------------------|
| Programme | B. Tech. (Civil Engineering) |
| Class, Semester | Second Year B. Tech., Sem III |
| Course Code | 7CV252 |
| Course Name | Engineering Surveying Laboratory |
| Desired Requisites: | Engineering Surveying |

Credits: 2

| Teaching Scheme | | Examination Scheme (Marks) | | | |
|-----------------|-------------|----------------------------|-----|---------|-------|
| Practical | 2 Hrs/ Week | LA1 | LA2 | Lab ESE | Total |
| Interaction | 0 Hrs/ Week | 30 | 30 | 40 | 100 |

Course Objectives

| | |
|---|---|
| 1 | To make familiar with conventional surveying equipment for their use in preliminary, detailed and check survey |
| 2 | To impart knowledge of land surveying techniques through field performance using appropriate surveying equipment |
| 3 | To conceptualize plan/ map preparation of the survey features based on field data collection, computations, errors, corrections |

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

| | | |
|-----|---|----------|
| CO1 | To recall use of conventional surveying equipment for land surveying | Apply |
| CO2 | To recognize appropriate methodology for surveying various land features by establishing horizontal and vertical control in the field | Analyze |
| CO3 | To evaluate technical suitability of the site based on reduction of field data | Evaluate |

List of Experiments / Lab Activities/Topics

Part I: Field Exercises

1. Horizontal distance measurement by chain & tape
2. Bearing measurement and determination of included angles in Compass Traversing
3. Use of minor equipment in reconnaissance survey
4. Levelling:
 - a. Study of Dumpy, Auto, and Tilting level
 - b. Reduction of levels by collimation plane & rise and fall method
 - c. Reciprocal levelling
 - d. Determination of sensitivity of level tube
 - e. Profile levelling & cross-sectioning
 - f. Demonstration of permanent adjustments
5. Plane Table Surveying Methods & Orientation
6. Theodolite survey
 - a. Horizontal angle measurement
 - b. Vertical angle measurement
 - c. Line out of Structures
 - d. Trigonometric levelling
 - e. Demonstration of permanent adjustments

II: Field Projects

1. Chain triangulation
2. Chain & Compass Traversing
3. Plane table traversing
4. Traversing by theodolite & computations
5. Road Surveying (Alignment, Earthwork calculations etc.)
6. Block and Radial Contouring

| CO-PO Mapping | | | | | | | | | | | | | | |
|---------------|-------------------------|---|---|---|---|---|---|---|---|----|----|----|-----|---|
| | Programme Outcomes (PO) | | | | | | | | | | | | PSO | |
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 1 | 2 |
| CO1 | | | | | | | | | 2 | | | | 1 | 1 |
| CO2 | | | | 2 | | | | | 2 | | | | 1 | 2 |
| CO3 | | | | 2 | | | | | 2 | | | | 1 | 2 |
| CO4 | | | | | | | | | | | | | | |

The strength of mapping is to be written as 1,2,3; where, 1: Low, 2: Medium, 3: High
Each CO of the course must map to at least one PO, and preferably to only one PO.

| Assessment | | | | |
|--|-------------------------------------|--|--|-------|
| There are three components of lab assessment, LA1, LA2 and Lab ESE. IMP: Lab ESE is a separate head of passing.(min 40 %), LA1+LA2 should be min 40% | | | | |
| Assess ment | Based on | Conducted by | Typical Schedule | Marks |
| LA1 | Lab activities, attendance, journal | Lab CourseFaculty | During Week 1 to Week 8 Marks Submission at the end of Week 8 | 30 |
| LA2 | Lab activities, attendance, journal | Lab CourseFaculty | During Week 9 to Week 16 Marks Submission at the end of Week16 | 30 |
| Lab ESE | Lab activities,journal/ performance | Lab Course Faculty and External Examiner as applicable | During Week 18 to Week 19 Marks Submission at the end of Week19 | 40 |
| Week 1 indicates starting week of a semester. Lab activities/Lab performance shall include performing experiments, mini-project, presentations, drawings, programming, and other suitable activities, as per the nature and requirement of the lab course. The experimental lab shall have typically 8-10 experiments and related activities if any. | | | | |

| Course Information | | | | | |
| Programme | | B.Tech. (Civil) | | | |
| Class, Semester | | Second Year B. Tech., Sem III | | | |
| Course Code | | 7MA201 | | | |
| Course Name | | Applied Mathematics for Civil Engineering | | | |
| Desired Requisites: | | Engineering Mathematics I & II | | | |
| Teaching Scheme | | Examination Scheme (Marks) | | | |
| Lecture | 3 Hrs/week | MSE | ISE | ESE | Total |
| Tutorial | - | 30 | 20 | 50 | 100 |
| | | Credits: 03 | | | |
| Course Objectives | | | | | |
| 1 | To impart mathematical skills and enhance the thinking power of students. | | | | |
| 2 | To introduce fundamental concepts of mathematics and their applications in engineering fields. | | | | |
| Course Outcomes (CO) with Bloom's Taxonomy Level | | | | | |
| CO | Description | Blooms Taxonomy | | | |
| | | Descriptor | | Level | |
| | At the end of the course, the students will be able to, | | | | |
| CO1 | Use Laplace Transform and Inverse Laplace Transform to solve linear differential equations. | Understanding | | | II |
| CO2 | Understand the Fourier series of periodic functions. | Understanding | | | II |
| CO3 | Apply PDEs for solving Engineering problems. | Applying | | | III |
| CO4 | Apply various discrete & continuous distributions to solve real-life problems. | Applying | | | III |
| CO5 | Apply basic concepts of Vector calculus to solve problems with conditions arising in the engineering field. | Applying | | | III |
| Module | Module Contents | | | | Hrs |
| I | Laplace Transform and Its Applications: Definition, Transform of Standard functions, Properties, Transform of derivative and Integral, Inverse Laplace Transform, Convolution Theorem, Applications to solve linear differential equations. | | | | 8 |
| II | Fourier Series: Periodic functions, Dirichlet's conditions, Definition, determination of Fourier coefficients (Euler Formulae), Expansion of functions, Even and odd functions, change of interval and functions having arbitrary period, Half range Fourier sine and cosine series. | | | | 7 |
| III | Partial Differential Equations: Four Standard forms of partial differential equations, application to one dimensional heat equation. | | | | 6 |
| IV | Probability Distribution: Random Variable, Discrete random variable, Continuous random variable, Probability mass function, Probability density function, Poisson distribution, Normal distribution, Examples. | | | | 5 |
| V | Vector Differentiation: Concept of vector field, directional derivatives, gradient of vector field, tangent line to the curve, velocity, acceleration, divergent and curl of vector field. | | | | 6 |

| | | |
|----|---|---|
| VI | Vector Integral: Line integrals, surface integral, Green's theorem in plane, Stoke's Theorem. | 7 |
|----|---|---|

CO-PO Mapping

| | Programme Outcomes (PO) | | | | | | | | | | | | PSO | |
|------------|-------------------------|---|---|---|---|---|---|---|---|----|----|----|-----|---|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 1 | 2 |
| CO1 | 1 | | | | | | | | | | | | | |
| CO2 | 2 | 1 | | | | | | | | | | | | |
| CO3 | 2 | 1 | | | | | | | | | | | | |
| CO4 | 1 | 1 | | | | | | | | | | | | |
| CO5 | 2 | 1 | | | | | | | | | | | | |

The strength of mapping is to be written as 1: Low, 2: Medium, 3: High
Each CO of the course must map to at least one PO.

Assessment

- The assessment is based on MSE, ISE, and ESE.
- MSE shall be typically on modules 1 to 3.
- ISE shall be taken throughout the semester in the form of a teacher's assessment. The mode of assessment can be field visits, assignments, etc., and is expected to map at least one higher-order PO.
- ESE shall be on all modules with around 25-30% weightage on modules 1 to 3 and 70-75% weightage on modules 4 to 6.
- For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed, and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)

|----------------------------|--|
| Programme | All WCE Programme |
| Class, Semester | SY BTech 1 st & 2 nd Sem |
| Course Code | 7VE201 |
| Course Name | Value Education |
| Desired Requisites: | Open mind and a willingness to learn |

| Teaching Scheme | | Examination Scheme (Marks) | | | |
|------------------------|-------------|-----------------------------------|-----|-----|-------|
| Lecture | 01Hrs/week | LA1 | LA2 | ESE | Total |
| Tutorial | 01 Hrs/week | 30 | 30 | 40 | 100 |
| Credits: - | | | | | |

Course Objectives

| | |
|---|---|
| 1 | Develop holistic personal and professional skills by enhancing communication, emotional intelligence, and resilience to foster positive relationships and sustainable living practices. |
| 2 | Promote ethical and sustainable leadership through the application of integrity, teamwork, and a growth mindset to navigate success and failure while mastering effective presentation and communication skills. |
| 3 | Empower lifelong learning and contribution by reflecting on personal values, engaging in critical thinking, and committing to continuous self-assessment and professional development for addressing global challenges. |

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

| CO | Course Outcome Statement/s | Bloom's Taxonomy Level | Bloom's Taxonomy Descriptor |
|------------|---|-------------------------------|------------------------------------|
| CO1 | Learn effective communication, empathy, and relationship-building skills to foster positive interactions in personal and professional settings. | I | Remembering |
| CO2 | Incorporate sustainable habits into daily life and build resilience through mindfulness and stress management to handle challenges and support environmental stewardship. | II | Understanding |
| CO3 | Develop goal-setting and achievement strategies, manage success and failure, and deliver impactful presentations for overall personal and professional development. | III | Applying |
| CO4 | Strengthen analytical skills and creative problem-solving techniques to make informed decisions and tackle complex issues in various contexts. | IV | Analyzing |

| Module | Module Contents | Hours |
|---------------|--|--------------|
| I | Interpersonal skills Introduction to Relationships, Communication Skills, Emotional Intelligence, Conflict Resolution, Maintaining Healthy Relationships | 5 |
| II | Sustainable Living Introduction to Sustainability, Environmental Impact, Sustainable Practices, Community Involvement, Personal Action Plan | 5 |
| III | Inner Peace and Resilience Understanding Inner Peace, Mindfulness and Meditation, Stress Management, Building Resilience, Positive Mindset | 5 |
| IV | The Art of Winning Winning Mindset, Goal Setting, Perseverance and Adaptability, Teamwork and Leadership, Case Studies and Real-life Examples | 5 |

| | | |
|----|---|---|
| V | Success and Failure Management Understanding Success and Failure, Learning from Failure, Growth Mindset, Balancing Success and Failure, Personal Development Plan | 5 |
| VI | The Art of Presentation Introduction to Presentations, Content Organization, Verbal and Non-Verbal Communication, Practice and Delivery, Feedback and Improvement | 5 |

| Assessment | | | | |
|---|-------------------------------------|--------------------|---|-------|
| There are three components of lab assessment, LA1, LA2, and Lab ESE IMP: Lab ESE is a separate head of passing. Lab ESE is treated as End Semester Exam and is based on all experiments/lab activities. | | | | |
| Assessment | Based on | Conducted by | Typical Schedule | Marks |
| LA1 | Lab activities, attendance, journal | Lab Course Faculty | During Week 1 to Week 6 Marks Submission at the end of Week 6 | 30 |
| LA2 | Lab activities, attendance, journal | Lab Course Faculty | During Week 7 to Week 12 Marks Submission at the end of Week 12 | 30 |
| Lab ESE | Lab Performance and documentation | Lab Course faculty | During Week 13 to Week 18 Marks Submission at the end of Week 18 | 40 |
| Week 1 indicates the starting week of a semester. The actual schedule shall be as per the academic calendar. Lab activities/Lab performance shall include performing experiments, mini-projects, presentations, drawings, programming and other suitable activities, as per the nature and requirement of the lab course. The experimental lab shall have typically 8-10 experiments. | | | | |

Walchand College of Engineering, Sangli

(Government Aided Autonomous Institute)

AY 2024-25

Course Information

| | |
|----------------------------|--|
| Programme | B. Tech. (Civil Engineering) |
| Class, Semester | Second Year B. Tech., Sem. IV |
| Course Code | 7CV221 |
| Course Name | Open Channel Hydraulics |
| Desired Requisites: | Fluid Mechanics and Hydraulic Machines |

| Teaching Scheme | | Examination Scheme (Marks) | | | |
|--------------------|-------------|----------------------------|------------|------------|--------------|
| Lecture | 03 Hrs/week | MSE | ISE | ESE | Total |
| Tutorial | - | 30 | 20 | 50 | 100 |
| Practical | - | | | | |
| Interaction | - | Credits: 03 | | | |

Course Objectives

| | |
|---|--|
| 1 | To instil know-how of open channel hydraulics as a prerequisite to the design of hydraulic structures. |
| 2 | To enhance problem-solving abilities by applying theoretical knowledge to analyse real-world open channel flow problems |
| 3 | To apply various hydraulic models and theories to analyse and predict flow characteristics in open channels, such as uniform flow, gradually varied flow, and rapidly varied flow. |
| 4 | To impart the basics of dimensional analysis and principles of physical modelling |

Course Outcomes (CO)

| CO | Description | Blooms Taxonomy | |
|-----|---|-----------------|-------|
| | | Descriptor | Level |
| CO1 | At the end of the course, the students will be able to, Explain fluid flow through open channels. | Understand | II |
| CO2 | Analyse the open channel flow to determine surface profiles and study energy dissipation | Analyse | III |
| CO3 | Apply hydraulic models and theories of open channel flow, including uniform flow, gradually varied flow, and rapidly varied flow | Apply | III |
| CO4 | Apply principles of dimensional analysis and hydraulic model testing. | Apply | III |

| Module | Module Contents | Hrs |
|--------|---|-----|
| I | Introduction to open channel Flow: Scope and importance, Types of open channel, Types of flows in open channel, Geometric elements, Velocity distribution, Energy and momentum equation applied to open channel flow, Measurement of velocity and discharge. | 7 |
| II | Uniform Flow: Uniform flow, Uniform flow characteristics, prismatic channel, Chezy's and Manning's Formulae, Manning's roughness coefficient, Uniform flow computations, Normal depth, Conveyance, Section factor, Hydraulic exponent, Hydraulically most efficient sections. | 7 |
| III | Specific Energy and Specific Force: Energy -Depth relationship in open channel flow, Specific energy - definition and diagram, Critical flow, Sub-critical and supercritical flow, Specific force -definition and diagram, Unit discharge and discharge diagram. | 6 |

| | | |
|----|---|---|
| IV | Gradually Varied flow: Definition and types of non-uniform flow, Gradually Varied Flow (GVF) and Rapidly Varied Flow (RVF), Basic assumptions of GVF; Governing Differential Equation of GVF- Alternative forms; Classification of channel bed-slopes; Zones of GVF profiles; Various GVF profiles, their general characteristics and examples of their occurrence; Control section., Gradually varied flow computations. | 8 |
| V | Rapidly varied flow: Phenomenon of Hydraulic jump; Location and examples of occurrence of hydraulic jump; Assumptions in the theory of hydraulic jump; Application of momentum equation to hydraulic jump in rectangular channel; Conjugate depths and relation between conjugate depths. Various terms related to hydraulic jump; Classification of hydraulic jump; Practical uses of hydraulic jump. Energy dissipation in hydraulic jump; graphical method of determination of energy dissipation. | 6 |
| VI | Dimensional Analysis and model testing: Dimensional analysis, Buckingham's theorem, Dimensionless numbers and its significance. Model similitude, Model laws, Theory and applications. | 6 |

Assessment

- The assessment is based on MSE, ISE, and ESE.
- MSE shall be typically on modules 1 to 3.
- ISE shall be taken throughout the semester in the form of a teacher's assessment. The mode of assessment can be field visits, assignments, etc., and is expected to map at least one higher-order PO.
- ESE shall be on all modules with around 25-30% weightage on modules 1 to 3 and 70-75% weightage on modules 4 to 6.
- For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed, and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)

| Course Objectives | | | | | |
| 1 | Impart Concepts in Building Planning and Functional Design. | | | | |
| 2 | Articulate integration of aesthetical concepts and influence of climate in building design | | | | |
| 3 | Establish the art of expressing buildings in terms of drawings. | | | | |
| Course Outcomes (CO) | | | | | |
| CO | At the end of the course, the students will be able to, | | | Descriptor | Level |
| CO1 | Perceive the requirements of residential/public buildings in terms of structural and functional aspects and apply the principles of planning, bye-laws/regulations during the planning process of buildings. | | | Understand and Apply | II & III |
| CO2 | Practice the planning ideologies in buildings, in relevance to building services, climatology, acoustics and fire resistance. | | | Apply | III |
| CO3 | Design buildings by composing functional and aesthetical aspects and illustrate building graphically in terms of engineering drawings. | | | Create | IV |
| Module | Module Contents | | | | Hrs |
| I | Site, Building and Building Drawings Categories of buildings as per NBC, Types of Residential buildings, Site selection, Factors influencing selection of site, guidelines for planning and drawing of buildings, Positions of various building components, types of drawings and relevant scales. | | | | 6 |
| II | Principles of Building Planning Conceptual understanding of Aspect, Prospect, Privacy, Furniture, Roominess, Grouping, Circulation, Sanitation, Lighting, Ventilation, Flexibility, Elegance, Sanitation, Economy and their interrelationship in the integrated planning of buildings. | | | | 7 |
| III | Building Bye laws Objectives, Minimum plot size, Building frontage, open spaces, exemption to open spaces, standard dimensions in buildings, Provision for light & ventilation, Means for access, Drainage & sanitation, FSI, Fungible FSI, Saleable areas, Transfer of development rights, RERA. | | | | 7 |
| IV | Climatology and Building design Elements of climate, Climatic zones, Comfort indices, Direction and its characteristics, orientation of buildings, Design of windows, Orientation criteria in various zones, Natural and Artificial means of achieving comfort. | | | | 6 |
| V | Aesthetics in Buildings Conceptual understanding of Aesthetics, Subjective and Objective Aesthetics, Aesthetic theory, Influence of Indian Architecture, Aesthetics in Engineering Design, Formal elements of functional design, Composition in Building Architecture | | | | 6 |

| | | |
|----|---|---|
| VI | <p>Acoustics and Fire resistance in buildings Applications, Sound ratings, conditions of good acoustics, Sound behavior in enclosures, Common acoustical defects, Echo & reverberation, acoustical design of auditoriums. Fire safety & role of designer, causes, fire loads & occupancies, Fire resistance of common building materials, general fire safety recommendations, Fire escapes, Alarms & extinguishing equipment.</p> | 7 |

| 1 | To explain the fundamental concepts of determinacy, stability of 2D structures etc. | | | | |
| 2 | To provide the knowledge of methods of analysis of indeterminate structures. | | | | |
| 3 | To introduce students to the matrix methods of analysis of structures. | | | | |
| Course Outcomes (CO) | | | | | |
| CO | At the end of the course, the students will be able to, | | | Blooms Taxonomy | |
| | | | | Descriptor | Level |
| CO1 | Explain the concepts of determinacy, stability, principle of superposition. | | | Understand | 2 |
| CO2 | Analyze the determinate and indeterminate structures determinate beams using suitable method. | | | Analyse | 3 |
| CO3 | Analyse the indeterminate beams and frames using the Slope deflection and Moment distribution method. | | | Analyse | 3 |
| CO4 | Explain and apply the basic concepts of matrix methods of structural analysis to beams. | | | Understand and Apply | 2/3 |
| Module | Module Contents | | | | Hrs |
| I | Slope and Deflection of Beams: Types of structures, Equilibrium and compatibility conditions, Determinacy and Stability of structures, Static and kinematic degree of indeterminacy for beams, trusses and frames. Principle of superposition. Computation of Slope and Deflections in Determinate beams: Double Integration Method, Macaulay's method, Moment area method and Conjugate beam method. | | | | 7 |
| II | Energy principles in structural analysis: Strain energy due to axial force, shear force, bending moment and torque. Castigliano's Strain Energy theorems. Computation of deflections in determinate structures such as beams, arches, trusses. Betti's Law and Maxwell's reciprocal theorems. Method of virtual work for slope and deflection of determinates structures | | | | 7 |
| III | Analysis of Indeterminate trusses and Arches Three hinged Arch, Two hinged arch, SFD and BMD for arches, Indeterminate truss analysis, Lack of fit of truss members, temperature stresses in Truss members. | | | | 7 |
| IV | Influence Line Diagrams: Muller-Breslau's principle and its application to statically determinate simple and compound beams. Influence line diagrams for support reaction, shear force and bending moment, ILD for member forces in statically determinate trusses | | | | 7 |
| V | Slope Deflection Method: Slope deflection equations, Case of sinking of supports, Analysis of indeterminate beams and portal frames with and without sway. | | | | 8 |

| | | |
|----|---|---|
| VI | <p>Moment Distribution Method: Carry over theorem, Distribution theorem, Relative and absolute stiffness, Distribution factors, Case of sinking of supports, Analysis of beams, frames with and without sway.</p> <p>Introduction to matrix methods for structural analysis Flexibility and stiffness coefficients, development of flexibility and stiffness coefficient matrix</p> | 6 |

| Course Objectives | | | | | |
| 1 | To impart knowledge about concepts of hydrology, precipitation and its data analysis. | | | | |
| 2 | To impart knowledge about runoff, stream flow measurement and groundwater hydrology. | | | | |
| 3 | To impart knowledge about fundamental concepts in irrigation. | | | | |
| 4 | To provide necessary knowledge about canal irrigation and watershed management practices. | | | | |
| Course Outcomes (CO) | | | | | |
| CO | Description | | | Blooms Taxonomy | |
| | At the end of the course, the students will be able to, | | | Descriptor | Level |
| CO1 | Explain concepts of hydrology and methods of precipitation data analysis. | | | Understand | II |
| CO2 | Describe runoff, stream flow measurement and groundwater hydrology. | | | Understand | II |
| CO3 | Use Soil water plant Relationship, for different methods of Field water application with basics of irrigation engineering. | | | Apply | III |
| CO4 | Demonstrate components related to canal engineering and Apply different principles of watershed development for sustainable water and soil conservation solutions | | | Apply | III |
| Module | Module Contents | | | | Hrs |
| I | Introduction to hydrology Hydrological cycle and application of hydrology. Precipitation: Types of Precipitation, measurement, analysis of Precipitation data, mass rainfall curves, intensity-duration curves, and concept of depth area duration analysis, frequency analysis. Evaporation, transpiration, evapotranspiration and infiltration. | | | | 5 |
| II | Runoff Rainfall-runoff relationships, Flow Duration Curve, Flow-mass Curve Applications Hydrograph analysis: Factors affecting runoff, Unit hydrograph theory and applications. Stream flow measurement. Floods Estimation and control, flood frequency analysis, Introduction to flood routing. | | | | 5 |
| III | Groundwater hydraulics Occurrence, Aquifers, hydraulic conductivity, transmissivity, Aquifer yield. Well irrigation: Well hydraulics, Tube wells- Types, Methods for drilling, Well Development. Open wells - Classification, Yield, Advantages and Disadvantages of well irrigation, Ground water recharge methods and its efficiency. | | | | 5 |

| | | |
|----|---|---|
| IV | Introduction to Irrigation Engineering Water requirement of crops, Soil Water-Plant Relationship, Methods of Field Water Application, Effects of excess water for irrigation, cropping pattern. Irrigation: Necessity, Survey and data collection for irrigation project, Reservoir planning and sediment control Types of Irrigation Schemes, performance assessment of irrigation scheme | 5 |
| V | Canal Irrigation Canal and Canal structures, Canal lining, Diversion head works- Weir and Barrages, Cross-Drainage works- Aqueduct, Siphon aqueduct, Super passage, Canal siphon, Canal Maintenance, Canal revenue assessment methods, canal water losses and its preventive measures | 4 |
| VI | Water Shed Development Check dam, Nala bund, Bandhara Irrigation- Construction and Working, Advantages and Disadvantages, Percolation tank- Need, Selection of site, Construction, Watershed management, the importance of stakeholder involvement, Soil conservation measures, Methods and design of Rainwater harvesting systems. | 4 |

Course Information

| | |
|---------------------|---|
| Programme | B. Tech. (Civil Engineering) |
| Class, Semester | Second Year B.Tech., IV |
| Course Code | 7CV271 |
| Course Name | Open Channel Hydraulics Laboratory |
| Desired Requisites: | Fluid Mechanics and Open Channel Hydraulics |

Teaching Scheme

Examination Scheme (Marks)

| Lecture | - | LA1 | LA2 | Lab ESE | Total |
|-------------|------------|-------------------|-----|---------|-------|
| Tutorial | - | 30 | 30 | 40 | 100 |
| Practical | 2 hrs/week | | | | |
| Interaction | - | Credits: 1 | | | |

Course Objectives

| | |
|---|--|
| 1 | To demonstrate behaviour of fluid flow through open channel using lab scale models |
| 2 | To provide hands on experience to measure open channel flow by using different lab scale Arrangements. |
| 3 | To provide hands-on practice to specific energy and energy dissipation in open channel flow. |
| 4 | To develop the analytical skills required for interpretation and analysis. |

Course Outcomes (CO)

| CO | Description | Blooms Taxonomy | |
|-----|--|-----------------|-------|
| | | Descriptor | Level |
| CO1 | Interpret behaviour of fluid flow through open channel. | Apply | III |
| CO2 | Calculate open channel flow by using different lab scale arrangements. | Apply | III |
| CO3 | Calculate specific energy and energy dissipation in open channel flow. | Apply | III |
| CO4 | Interpret and analyze data obtained through lab-scale experiments performed on uniform and non-uniform flows | Apply | III |

List of Experiments / Lab Activities

List of Experiments:

1. Measurement of velocity for open channel flow by using pitot tube and current meter.
2. Determination of Manning's and Chezy's constant for open channel flow by using uniform flow Formulae.
3. Study of nappe profile over a sharp crested weir by providing with and without ventilation below the lower nappe.
4. Measurement of open channel flow by using
 - i. Rectangular Notch
 - ii. Triangular Notch
 - iii. Broad Crested Weir.
 - iv. Round Crested Weir.
 - v. Venturi flume.
5. Develop specific energy and specific force diagrams of hydraulic jump in the open channel flow.
6. Develop the different type of hydraulic jumps in open channel flow and estimation of loss of energy.

(Government Aided Autonomous Institute)

AY 2024-25

Course Information

| | |
|----------------------------|--|
| Programme | B.Tech. (All branches) |
| Class, Semester | Second Year B.Tech., Sem - II |
| Course Code | |
| Course Name | Employability Skills Development (ESD) |
| Desired Requisites: | -- |

| Teaching Scheme | | Examination Scheme (Marks) | | | |
|--------------------|-----------|----------------------------|------------|------------|--------------|
| Lecture | 4Hrs/week | ISE | MSE | ESE | Total |
| Tutorial | - | 20 | 30 | 50 | 100 |
| Practical | - | | | | |
| Interaction | - | Credits: 2 | | | |

Course Objectives

| | |
|----------|--|
| 1 | To improve the problem-solving skills of students |
| 2 | To understand the approach towards problem solving |
| 3 | Understanding the sectional cut-offs for different companies |

Course Outcomes

| | | |
|------------|---|--|
| CO1 | Ability to improve the accuracy percentage | |
| CO2 | Understand the current changing recruitment trends | |
| CO3 | Understanding the differential marking scheme in papers | |
| CO4 | Performance improvement in competitive exams like CAT, GATE | |

| Module | Module Contents | Hours |
|---------------|--|--------------|
| I | Arithmetic I Ratio, Proportion, Mark Up & Discount, Averages, Mixtures & Alligations, Simple & Compound Interest | 6 |

| | | |
|-----|---|---|
| II | Arithmetic II Percentages, Profit & Loss, Time & Work, Time, Speed & Distance, Boat & Streams, Linear Races | 8 |
| II | Numbers Cyclicity, Remainders, Cyclicity of Remainders, Indices, Factors, LCM, HCF | 4 |
| III | Permutation, Combination, Probability Fundamental principal of counting, Arrangements, Selection, Grouping, Distribution, Independent Events, Conditional Probability, Binomial Distribution | 6 |
| IV | Logical Reasoning Clocks, Calendars, Games & Tournaments, Analytical Puzzles, Binary Logic, Blood relations, Directions, Coding, Decoding, Seating Arrangement (Linear, Circular & Rectangular) | 6 |
| V | Verbal Ability I Vocabulary - Synonyms, Antonyms, Analogies Reading Comprehension, Para Jumbles | 6 |
| VI | Verbal Ability II Parts of Speech, Tenses, Subject Verb Agreement | 4 |

CO-PO Mapping

| | Programme Outcomes (PO) | | | | | | | | | | | | PSO | | |
|------------|-------------------------|---|---|---|---|---|---|---|---|----|----|----|-----|---|---|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 1 | 2 | 3 |
| CO1 | | | | | | | | | | | 3 | | | | |
| CO2 | | | | | | | 2 | | | | | | | | |
| CO3 | | | | | | | | | 3 | | | | | | |
| CO4 | | | | | | | | | | 3 | | | | | |

The strength of mapping is to be written as 1,2,3; Where, 1: Low, 2: Medium, 3: High
Each CO of the course must map to at least one PO.

Assessment

The assessment is based on the MCQ test which will be conducted online through the platform and it will be a proctored test. No negative marking will be there in the test. Test will be of 60 minutes with 20 questions each on Quantitative Aptitude, Logical Reasoning & Verbal Ability

Walchand College of Engineering, Sangli

(Government Aided Autonomous Institute)

AY 2024-25

Course Information

| | |
|----------------------------|--|
| Programme | B. Tech. (Civil Engineering) |
| Class, Semester | Second Year B.Tech. |
| Course Code | 7IK201 |
| Course Name | IKS: Introduction to Ancient Indian Technology |
| Desired Requisites: | |

| Teaching Scheme | | Examination Scheme (Marks) | | | |
|--------------------|-------------|----------------------------|------------|------------|--------------|
| Lecture | 3 Hrs./week | MSE | ISE | ESE | Total |
| Tutorial | - | 30 | 20 | 50 | 100 |
| Practical | - | | | | |
| Interaction | - | Credits: 3 | | | |

Course Objectives

| | |
|---|---|
| 1 | To understand development of architecture solutions within the restraints imposed by prevalent social and cultural setup, available building materials, climate and geography of particular region. |
| 2 | Insight of the evolution of architecture in Indian subcontinent. |

Course Outcomes (CO)

| CO | Description | Blooms Taxonomy | |
|-----|--|-----------------|-------|
| | | Descriptor | Level |
| CO1 | <i>Understand</i> evolution of architectural styles in Indian subcontinent | Understand | II |
| CO2 | <i>Understand</i> the development of construction technology in Indian subcontinent | Understand | II |
| CO3 | <i>Understand</i> impact of previous architectural styles on successive architectural styles | Understand | II |
| CO4 | <i>Differentiate</i> various Indian architectural styles | Understand | II |

| Module | Module Contents | Hours |
|--------|---|-------|
| I | Harappan and Vedic Architecture Architecture and town planning of Harappan civilization such as towns of Lothal, Mohenjo Daro, Dholavira, Kalibanga etc. Understanding of Vedic architecture and settlements. | 4 |
| II | Buddhist and Jain Architecture Architectural examples of Mahayana and Hinayana Buddhism; Rock-cut and free standing. Study of caves, stupas, and viharas of places like Sanchi, Amravati, Karle, Ajanta etc. Medieval Jain temple architecture of western India. | 4 |
| III | Hindu Architecture Study of chronological development of religious and secular Hindu architecture and settlement planning; Early examples of monolithic and rock-cut architecture of South India. Development of Nagara and Dravidian temple architecture under different dynasties; such as like Cholas, Vijaynagar, Chandels, Hampi, Tanjavur, Khajuraho. Characteristic features of East, South, Central, West, and North Indian temple architecture for plan, shikhara, pillars, decoration, sculpture, etc. Theoretical base of Indian Architecture; examples from treatises like Mayamatam, Manasara, Samarangana Sutradhara etc. | 6 |
| IV | Islamic Architecture Introduction early Islamic architecture in India. Characteristic features of Islamic architecture; minarets, domes, gardens, geometrical and calligraphic decorations. The buildings of different dynasties of Delhi, Agra, Deccan, Gujarat etc. | 4 |

| | | |
|----|--|---|
| V | Colonial Architecture English, French, Dutch and Portuguese Colonial architecture in Indian subcontinent. Architectural literary research work of scholars like Ram Raz, P.K. Acharya etc. | 4 |
| VI | Contemporary Architecture Post Independence architecture and planning; New city planning: Chandigarh, Gandhinagar etc. Modern foreign and Indian architects and their works in India. | 4 |

| Programme | B. Tech. (Civil Engineering) |
| Class, Semester | Second Year B. Tech., Sem IV |
| Course Code | 7VSCV272 |
| Course Name | Advanced Surveying Lab |
| Desired Requisites: | Engineering Surveying and Engineering Surveying Laboratory |

Teaching Scheme

Examination Scheme (Marks)

| | | | | | |
|--------------------|-------------|------------|------------|----------------|--------------|
| Practical | 2 Hrs/ Week | LA1 | LA2 | Lab ESE | Total |
| Interaction | 1 Hrs/ Week | 30 | 30 | 40 | 100 |

Credits:1

Course Objectives

- 1 To demonstrate advanced surveying techniques through field exercises.
- 2 To develop and retain a basic understanding of employing special functions of advanced survey Instruments for land Surveys.

Course Outcomes (CO) with Bloom's Taxonomy Level

At the end of the course, the students will be able to,

| CO | Course Outcome Statement/s | Bloom's Taxonomy | |
|-----|---|------------------|-------|
| | | Description | Level |
| CO1 | Study digital level, digital theodolite, auto reduction tachometer and total station and use appropriate surveying instruments for field exercises. | Applying | III |
| CO2 | Demonstrate the use of advanced instruments for topographic survey. | Understand | II |

List of Experiments / Lab Activities/Topics

List of Experiments:

Part I: Field Exercises

1. Levelling

- a. Study of Digital level
- b. Levelling exercises
- c. Digital data processing

2. Digital Theodolite

- a. Study of micro optic theodolite
- b. Angle measurement and traversing
- c. Trigonometric levelling

3. Tacheometry

- a. Determination of constants of Tacheometer
- b. Stadia tacheometry for length, gradient, and area determination
- c. Study of subtense bar

d. Auto reduction tacheometry for length, gradient, and area determination

4. Study of Total Station

- a. Exercises based on various functions
- b. Digital data processing

Part II: Field Projects Project Survey for setting out, alignment, contouring, earthwork computations, drawing preparation etc.

CO-PO Mapping

| | Programme Outcomes (PO) | | | | | | | | | | | | PSO | |
|------------|-------------------------|---|---|---|---|---|---|---|---|----|----|----|-----|---|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 1 | 2 |
| CO1 | 1 | | | | 3 | | | | | | | | 3 | 2 |
| CO2 | | | | 2 | 3 | | | | 2 | | | | 3 | 2 |

The strength of mapping is to be written as 1,2,3; where, 1: Low, 2: Medium, 3: High
Each CO of the course must map to at least one PO, and preferably to only one PO.

Assessment

There are three components of lab assessment, LA1, LA2 and Lab ESE.

IMP: Lab ESE is a separate head of passing.(min 40 %), LA1+LA2 should be min 40%

| Assessment | Based on | Conducted by | Typical Schedule | Marks |
|------------|--------------------------------------|--|---|-------|
| LA1 | Lab activities, attendance, journal | Lab Course Faculty | During Week 1 to Week 8 Marks Submission at the end of Week 8 | 30 |
| LA2 | Lab activities, attendance, journal | Lab Course Faculty | During Week 9 to Week 16 Marks Submission at the end of Week 16 | 30 |
| Lab ESE | Lab activities, journal/ performance | Lab Course Faculty and External Examiner as applicable | During Week 18 to Week 19 Marks Submission at the end of Week 19 | 40 |

Week 1 indicates starting week of a semester. Lab activities/Lab performance shall include performing experiments, mini-project, presentations, drawings, programming, and other suitable activities, as per the nature and requirement of the lab course. The experimental lab shall have typically 8-10 experiments and related activities if any.

Walchand College of Engineering, Sangli

(Government Aided Autonomous Institute)

AY 2024-25

Course Information

| | |
|---------------------|---|
| Programme | B.Tech. (Civil Engineering) |
| Class, Semester | Second Year B.Tech., IV |
| Course Code | 7VSCV271 |
| Course Name | Mini Project: Building Planning and CAD |
| Desired Requisites: | Building Materials and Construction |

| Teaching Scheme | | Examination Scheme (Marks) | | | |
|-----------------|------------|----------------------------|-----|---------|-------|
| Lecture | - | LA1 | LA2 | Lab ESE | Total |
| Tutorial | - | 30 | 30 | 40 | 100 |
| Practical | 2 hrs/week | | | | |
| Interaction | - | Credits: 1 | | | |

Course Objectives

| | |
|---|---|
| 1 | Impart the approach to functionally plan and design a typical building by applying concepts of principal of planning and implementation of byelaws. |
| 2 | Contribute necessary knowledge to apply the various building services viz. plumbing, electrification and furniture within the buildings. |
| 3 | Create awareness of aesthetics and architectural ornamentation in buildings through engineering drawings |

Course Outcomes (CO)

| CO | Description | Descriptor | Level |
|-----|--|------------|-------|
| CO1 | Illustrate the requirements of residential/public building in terms of structural, functional, architectural aspects and apply the principles of planning, bye laws during planning process and designing building for chosen project. | Apply | III |
| CO2 | Study and Integrate different building services, namely, water supply, drainage facilities and electrification services for the selected project. | Integrate | |
| CO3 | Communicate and interact as a team to apply the drawing techniques and compose buildings using conventional and modern tools. | Create | VI |

List of Experiments / Lab Activities

List of Activities:

- Forming groups of 4-5 students in each batch and allocating a type of building as a project work. An overall ideation of the various planning phases will be explained to the students.
- For the type of building chosen, each group will visit 2-3 existing buildings and will present the development in planning for the given problem: Size & nature of plot, Soil conditions and gradient, Structural system, Requirements of the building, Drawings to be submitted, during the second week.
- For the selected type of building, presentation on the following: Bubble diagram, grouping of various rooms, a tentative plan of the building based on principles of planning privacy, ventilation, lighting, sizes for functional comfort, openings.
- The group will present scaled drawings on graph sheets about the Building Plan based on principles of planning and bye laws. Drawing sheets based on orientation of buildings, climate, Minimizing internal heat gain, Design of staircase. The group will present the revised scaled drawings on Drawing sheets based on, Plumbing for water supply and drainage, Design of the plumbing system, Electrification, Location of Switchboards, min. no. of points, safety devices.
- The various phases and improvements in of planning process will be a continuous activity and should lead to a final ideal plan for which detailed drawings using Auto CAD are to be submitted as under:
 - Municipal drawings- Plan, section and front elevation, site plan, area calculations statement.
 - Plans showing furniture and electrification details
 - Plan showing water supply and plumbing layout, terrace slope and drainage, table of materials used.
- Students will have to draw all the finalized building plans using AutoCAD and attach its print along with the previous sheets as submission work

Assessment

The assessment is based on MSE, ISE and ESE.

MSE shall be typically on modules 1 to 3.

ISE shall be taken throughout the semester in the form of teacher's assessment. Mode of assessment can be field visit, assignments etc. and is expected to map at least one higher order PO.

ESE shall be on all modules with around 40% weightage on modules 1 to 3 and 60% weightage on modules 4 to 6.

For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)
