4	7MD402	B	Microelectromechanical Systems	2	0	1	0	3
5	7MD452	B	Mini Project	0	0	0	4	2
<b>Total</b>				<b>8</b>	<b>0</b>	<b>4</b>	<b>4</b>	<b>14</b>

### 3. MDM in VLSI Design

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD253	IV	<a href="#">Introduction to Verilog Programming</a>	2	0	0	2	3
2	7MD313	V	Verilog based System Design	2	0	1	0	3
3	7MD353	VI	Digital System Architecture	2	0	1	0	3
4	7MD403	B	Testing and Verification of VLSI Circuits	2	0	1	0	3
5	7MD453	B	Mini Project	0	0	0	4	2
<b>Total</b>				<b>8</b>	<b>0</b>	<b>3</b>	<b>6</b>	<b>14</b>

### 4. MDM in Embedded Systems & RTOS

S. N.	Code	Semester	Course Title	L	T	I	P	C
-------	------	----------	--------------	---	---	---	---	---

1	7MD254	IV	<a href="#">Digital Systems and Microprocessors</a>	2	0	1	0	3
2	7MD314	V	Microcontroller Based Systems	2	0	0	2	3
3	7MD354	VI	Embedded System Design	2	0	0	2	3
4	7MD404	B	Real Time Operating Systems	2	0	1	0	3
5	7MD454	B	Mini Project	0	0	0	4	2
<b>Total</b>				<b>8</b>	<b>0</b>	<b>2</b>	<b>8</b>	<b>14</b>

### 5. MDM in Geomatics Engineering

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD255	IV	<a href="#">Surveying and Mapping</a>	2	0	1	0	3
2	7MD315	V	Digital Image Processing and Remote Sensing	2	0	0	2	3
3	7MD355	VI	Geographic Information System	2	0	0	2	3
4	7MD405	B	Geospatial Data Analytics and Applications	2	0	1	0	3
5	7MD455	B	Mini project	0	0	0	4	2
<b>Total</b>				<b>8</b>	<b>0</b>	<b>2</b>	<b>8</b>	<b>14</b>

### 6. MDM in Art and Technology

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD256	IV	<a href="#">Principles of Drawing and Sketching</a>	2	0	0	2	3
2	7MD316	V	History of Indian Art	2	0	1	0	3
3	7MD356	VI	2D Animation and multimedia techniques	2	0	1	0	3
4	7MD406	B	3D Product design development	2	0	0	2	3
5	7MD456	B	Mini Project	0	0	0	4	2
<b>Total</b>				<b>8</b>	<b>0</b>	<b>2</b>	<b>8</b>	<b>14</b>

### 7. MDM in Cloud Infrastructure & Automation

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD257	IV	<a href="#">Cloud Network &amp; Fundamentals</a>	2	0	1	0	3
2	7MD317	V	Virtualization Technologies	2	0	0	2	3
3	7MD357	VI	Cloud Computing Systems	2	0	1	0	3
4	7MD407	B	Enterprise Cloud Platforms: AWS & Azure	2	0	0	2	3
5	7MD457	B	Mini Project	0	0	0	4	2
<b>Total</b>				<b>8</b>	<b>0</b>	<b>2</b>	<b>8</b>	<b>14</b>

### 8. MDM in Cyber security and Digital Forensics

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD258	IV	<a href="#">Cybersecurity Essentials</a>	2	0	1	0	3
2	7MD318	V	Digital Forensics & Incident Response	2	0	1	0	3
3	7MD358	VI	Advanced Cyber Threats & Defence	2	0	0	2	3
4	7MD408	B	Cybersecurity Policy, Governance & Ethics	2	0	1	0	3
5	7MD458	B	Mini Project	0	0	0	4	2
<b>Total</b>				<b>8</b>	<b>0</b>	<b>3</b>	<b>6</b>	<b>14</b>

### 9. MDM in AIML

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD259	IV	<a href="#">Essentials of AI</a>	2	0	1	0	3
2	7MD319	V	Searches and Logic in AI	2	0	1	0	3
3	7MD359	VI	<a href="#">Machine Learning using Python</a>	2	0	0	2	3
4	7MD409	B	Deep learning and Generative AI	2	0	1	0	3
5	7MD459	B	Mini Project	0	0	0	4	2
<b>Total</b>				<b>8</b>	<b>0</b>	<b>3</b>	<b>6</b>	<b>14</b>

### 10. MDM in AgriTech

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD260	IV	<a href="#">Precision Agriculture</a>	2	0	1	0	3
2	7MD320	V	Mechanization in Agriculture	2	0	1	0	3
3	7MD360	VI	Post-harvest Management	2	0	1	0	3
4	7MD410	B	AI-Enabled Agriculture	2	0	0	2	3
5	7MD460	B	Mini Project	0	0	0	4	2
<b>Total</b>				<b>8</b>	<b>0</b>	<b>3</b>	<b>6</b>	<b>14</b>

### 11. MDM in Sustainability

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD261	IV	<a href="#">Sustainable Energy Transition in India</a>	2	0	1	0	3

2	7MD321	V	Sustainable Electronics	2	0	1	0	3
3	7MD361	VI	Design Thinking for Sustainability	2	0	1	0	3
4	7MD411	B	Green Computing	2	0	1	0	3
5	7MD461	B	Mini Project in Sustainability	0	0	0	4	2
<b>Total</b>				8	0	4	4	<b>14</b>

### 12. MDM in Industry 4.0

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD262	IV	<a href="#">Cyber-Physical Manufacturing</a>	2	0	1	0	3
2	7MD322	V	Digital Twin and Robotics	2	0	1	0	3
3	7MD362	VI	Next-Gen Manufacturing	2	0	1	0	3
4	7MD412	B	Reliability and Industrial Automation	2	0	1	0	3
5	7MD462	B	Mini Project	0	0	0	4	2
<b>Total</b>				8	0	4	4	<b>14</b>

### 13. MDM in Industrial Engineering and Operations Research

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD263	IV	<a href="#">Introduction to Industrial Engineering</a>	2	0	1	0	3
2	7MD323	V	Operations Research Methods	2	0	1	0	3
3	7MD363	VI	Quality Control and Reliability	2	0	1	0	3
4	7MD413	B	Inventory and Supply Chain Management	2	0	1	0	3
5	7MD463	B	Mini Project	0	0	0	4	2
<b>Total</b>				8	0	4	4	<b>14</b>

### 14. MDM in Construction and Project Management

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD264	IV	<a href="#">Project Management for Infrastructure Development</a>	2	0	1	0	3
2	7MD324	V	Human Resource and Labour Management	2	0	1	0	3
3	7MD364	VI	Occupational Health and Safety Management	2	0	1	0	3

4	7MD414	B	Finance and Contract Management	2	0	1	0	3
5	7MD464	B	Mini Project	0	0	0	4	2
<b>Total</b>				8	0	4	4	<b>14</b>

### 15. MDM in Systems Engineering

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD265	IV	<a href="#">Data Interpretation and Analysis</a>	2	0	1	0	3
2	7MD325	V	Fundamentals of System Engineering and Architecture	2	0	1	0	3
3	7MD365	VI	System Dynamics	2	0	1	0	3
4	7MD415	B	Digital Twin Techniques	2	0	1	0	3
5	7MD465	B	Mini Project	0	0	0	4	2
<b>Total</b>				8	0	4	4	<b>14</b>

### 16. MDM in Quantum Technology

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD266	IV	<a href="#">Foundations of Quantum Computing</a>	2	0	1	0	3
2	7MD326	V	Quantum Algorithms	2	0	0	2	3
3	7MD366	VI	Quantum Hardware, Error & Noise Mitigation	2	0	1	0	3
4	7MD416	B	Advances in Quantum Technology	2	0	1	0	3
5	7MD466	B	Mini Project	0	0	0	4	2
<b>Total</b>				8	0	3	6	<b>14</b>

### 17. MDM in Innovation and Entrepreneurship Development

S. N.	Code	Semester	Course Title	L	T	I	P	C
-------	------	----------	--------------	---	---	---	---	---

1	7MD267	IV	<a href="#">Fundamentals of Innovation and Entrepreneurship</a>	2	0	1	0	3
2	7MD327	V	Ideation to Prototyping - Designing for Success	2	0	1	0	3
3	7MD367	VI	Defining Your Business Strategy	2	0	1	0	3
4	7MD417	B	Business Acceleration and Scaling	2	0	1	0	3
5	7MD467	B	Creating your own Venture	0	0	0	4	2
<b>Total</b>				8	0	4	4	<b>14</b>

### 18. MDM in Smart Cities

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD268	IV	<a href="#">Introduction to Urban Planning</a>	2	0	1	0	3
2	7MD328	V	Smart Infrastructure	2	0	1	0	3
3	7MD368	VI	<a href="#">Data Science and Analytics for Smart Cities</a>	2	0	1	0	3
4	7MD418	B	Green Technology and sustainability	2	0	1	0	3
5	7MD468	B	Mini project	0	0	0	4	2
<b>Total</b>				8	0	4	4	<b>14</b>

### 19. MDM in EV

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD269	IV	<a href="#">Introduction to Electric Vehicles</a>	2	0	1	0	3
2	7MD329	V	Drives and Control for Electric Vehicles	2	0	1	0	3
3	7MD369	VI	<a href="#">Embedded Systems for Automotive Applications</a>	2	0	0	2	3
4	7MD419	B	Intelligent EV Ecosystems	2	0	1	0	3
5	7MD469	B	Mini Project	0	0	0	4	2
<b>Total</b>				8	0	3	6	<b>14</b>

### 20. MDM in Fintech

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD270	IV	<a href="#">Introduction to Financial Markets</a>	2	0	1	0	3
2	7MD330	V	Risk Management and Compliance	2	0	1	0	3
3	7MD370	VI	<a href="#">Financial Modelling</a>	2	0	1	0	3
4	7MD420	B	Data Science and analytics for FinTech	2	0	1	0	3
5	7MD470	B	Mini Project	0	0	0	4	2
<b>Total</b>								<b>14</b>

### 21. MDM in Robotics and Automation

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD271	IV	<a href="#">Fundamentals of Robotics and Automation</a>	2	0	1	0	3
2	7MD331	V	Robot Kinematics and Dynamics	2	0	1	0	3
3	7MD371	VI	<a href="#">Computer Vision in Robotics</a>	2	0	1	0	3
4	7MD421	B	Control of Robotics Systems	2	0	1	0	3
5	7MD471	B	Mini Project	0	0	0	4	2
<b>Total</b>				<b>8</b>	<b>0</b>	<b>4</b>	<b>4</b>	<b>14</b>

### 22. MDM in Electronics Engineering

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD272	IV	<a href="#">Electronic Devices and Circuits</a>	2	0	1	0	3
2	7MD332	V	Digital Systems	2	0	1	0	3
3	7MD372	VI	Microprocessors and Microcontrollers	2	0	0	2	3
4	7MD422	B	Communication Engineering	2	0	1	0	3
5	7MD472	B	Mini Project	0	0	0	4	2
<b>Total</b>				<b>8</b>	<b>0</b>	<b>3</b>	<b>6</b>	<b>14</b>

### 23. MDM in Information Technology

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD273	IV	<a href="#">Data Structure and Algorithm</a>	2	0	0	2	3

2	7MD333	V	Operating System and Computer Networks	2	0	1	0	3
3	7MD373	VI	Database Engineering and Web Technology	2	0	0	2	3
4	7MD423	B	Open Source Software Engineering	2	0	1	0	3
5	7MD473	B	Mini-Project	0	0	0	4	2
<b>Total</b>				<b>8</b>	<b>0</b>	<b>2</b>	<b>8</b>	<b>14</b>

**24. MDM in Computer Science and Engineering**

S. N.	Code	Semester	Course Title	L	T	I	P	C
1	7MD274	IV	<a href="#">Data Structure and Algorithm</a>	2	0	0	2	3
2	7MD334	V	Software Engineering and Database Essentials	2	0	0	2	3

<b>Walchand College of Engineering, Sangli</b> <i>(Government Aided Autonomous Institute)</i>					
<b>AY 2025-26 onwards</b>					
<b>Course Information</b>					
<b>Programme</b>		Multidisciplinary Minor			
<b>Class, Semester</b>		Second Year B. Tech., Sem.-II			
<b>Course Code</b>		7MD251			
<b>Course Name</b>		Fundamentals of Digital Communication and Networking			
<b>Desired Requisites:</b>		Basic Electronics Engineering, Engineering Mathematics			
<b>Teaching Scheme</b>		<b>Examination Scheme (Marks)</b>			
<b>Lecture</b>	2 Hrs/week	<b>MSE</b>	<b>ISE</b>	<b>ESE</b>	<b>Total</b>
<b>Interaction</b>	1 Hr /week				
<b>Tutorial</b>	-	30	20	50	100
<b>Practical</b>	-	<b>Credits: 3</b>			
<b>Course Objectives</b>					
<ol style="list-style-type: none"> <li>1. To introduce the basic principles of signals, data transmission, and modulation.</li> <li>2. To understand the foundations of digital communication and error control.</li> <li>3. To learn OSI &amp; TCP/IP models and key networking concepts.</li> <li>4. To understand foundation for networking and security.</li> </ol>					
<b>Course Outcomes (CO)</b>					
<b>CO</b>	<b>Description</b>	<b>Blooms Taxonomy</b>			
		<b>Descriptor</b>	<b>Level</b>		
<b>CO1</b>	Understand the building blocks of digital communication systems, including sampling, quantization, modulation, and channel models.	Understand	II		
<b>CO2</b>	Differentiate various digital modulation schemes and interpret error-control coding techniques used in digital communication.	Analyze	IV		
<b>CO3</b>	Describe the OSI and TCP/IP communication layers along with the functions of each layer.	Understand	II		
<b>CO4</b>	Analyze routing algorithms, addressing schemes, switching techniques, and end-to-end data transmission strategies.	Analyze	IV		
<b>CO - PO mapping</b>					

Programme Outcomes (PO)											
COs	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO1 0	PO1 1
CO 1	3										
CO 2	3	3			2						1
CO 3	3										
CO 4	3	3	2		2						
Module	Module Contents										Hours
I	<b>Communication Fundamentals</b> Basics of Analog and Digital signals, EM spectrum, bandwidth, channels, noise & distortion, SNR, attenuation, channel impairments, Sampling theorem, aliasing, quantization										4
II	<b>Digital Transmission Techniques</b> Pulse code modulation (PCM), DPCM, DM, Line coding: NRZ, RZ, Manchester, Bit rate vs baud rate, Error detection & correction: parity, checksum, CRC, Channel capacity: Shannon theorem										6
III	<b>Digital Modulation</b> ASK, FSK, PSK, QPSK, QAM (conceptual constellation), BER, noise effects, eye diagram, Multiplexing: TDM, FDM concepts										5
IV	<b>Computer Networking Basics</b> OSI 7-layer model, TCP/IP architecture, Transmission media: wired & wireless, Switching: circuit, packet, message switching										5
V	<b>IP Networks &amp; Routing</b> IPv4 addressing, subnetting concepts, DHCP, DNS, NAT, Routing basics: static vs dynamic, Introduction to routers & switches										5
VI	<b>Internet Communication &amp; Security</b> HTTP/HTTPS, FTP, SMTP, Basic cryptography concepts, Firewalls, IDS, IPS, Applications: WiFi, cellular systems, enterprise networks										5
<b>Total Hrs: 30</b>											
<b>Course Assessment Plan (for total 60 learning hours)</b>											

Assessment No.		Formative Assessment type	Brief Description	Marks	Notional Learning hours	Week
ISE	1	Quiz, Crossword etc. using online tools	Quiz using Google Forms, Kahoot, Mentimeter (covering Modules 1-2)	10	5	3
	2	Assignment Problem-Solving / Short Assignment	Numerical problems on modulation, error control coding; worksheet on OSI layers	10	5	5
MSE	3	Case Study Presentation	Students present a case study on communication/networking	15	10	7
	4	Open Book Exam	Application-based questions on modulation, coding, and networking basics	15	5	7
ESE	5	Mini-Project	Small project: e.g., simulate a network, analyze BER	20	15	10
	6	Seminar	Students present a topic related to digital communication or networking (5G, IoT, routing, etc.)	15	10	11
	7	Oral/Viva Exam	Viva on project + overall understanding	15	10	13
<b>Total</b>				<b>100</b>	<b>60 hrs</b>	

**Text Books**

1	Data Communications and Networking - Behrouz Forouza
2	Digital Communications - Simon Haykin
3	
4

Programme Outcomes (PO)											
COs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11
CO1	3										
CO2	3										
CO3	3										
CO4					2						

  

Module	Module Contents	Hours
I	<b>Fundamentals of Semiconductors and Crystal Growth</b> Basics of Semiconductors: Crystal Structure, Defects and Properties, Carrier Transport phenomena, Silicon Crystal Growth: Electronic Grade Silicon, Compound Semiconductor, Crystal Growth Methods, Wafer Manufacturing and Orientation.	6
II	<b>Junctions and Transistors</b> P-N junction, Metal-semiconductor junction, Tunnel diodes, Bipolar Junction Transistor, Heterojunction, MOS capacitor, Capacitance-Voltage characteristics, MOSFET, JEFET, Current-Voltage characteristics.	6
III	<b>Advanced Semiconductor Devices</b> Compound semiconductor devices (GaN, InGaAs, SiC) Advanced MOSFET, MOSFET Scaling, CMOS and BiCMOS, MESFET, MODFET, Microwave Diodes, Schottky Barrier Diode, Memory (NAND or Flash).	6
IV	<b>Photonic Devices and Display Technologies</b> LED, Photovoltaics, Photodetector, Phototransistors, Photomultiplier tube, CCD and CMOS sensors, CIS image sensor, LED-based display, understanding of RGB pixel technology, OLED and AMOLED displays, QLED, touch screen display	6
V	<b>Integrated Circuits</b> Evolution of Integrated Circuits, Monolithic device elements, Charge Transfer devices, Ultra Large-Scale Integration (ULSI), Testing, Bonding, and Packaging.	3
VI	<b>Design and Simulation of Semiconductor Devices</b> Design and simulation of PN junction, simulation of MOSFET, simulation of MOS capacitor, simulation of CMOS Gates and study its response, using TCAD/ Microwind or any other simulation software.	3
<b>Total Hrs : 30</b>		

  

<b>Course Assessment Plan (for total 60 learning hours)</b>
---

Assessment No.		Formative Assessment type	Brief Description	Marks	Notional Learning hours	Week
ISE	1	Assignments	Based on semiconductor materials, P-N junction, Transistors	15	8	3
	2	Article Discussion	Recent advancements in semiconductor devices, Moore's Law	5	2	4
MSE	3	Short Quiz/ MCQ Test	Basic and Advanced semiconductor materials and P-N junction and Transistors	20	10	6
	4	Seminar	Current design trends in semiconductor devices, new semiconductor devices	10	5	8
ESE	5	Quiz/ MCQ Test	Optoelectronic devices, display technologies, and Integrated Circuits	30	20	12
	6	Mini Project	Simulation of semiconductor devices	10	10	13
	7	Oral/ Viva Exam	All modules and to evaluate the understanding of solid-state electronic devices	10	5	14
<b>Total</b>				<b>100</b>	<b>60 hrs</b>

Module	Module Contents	Hours
I	<b>Combinational Circuit:</b> Review of K-Map, Adders, Subtractors, Mux, Demux, Design using Mux-Demux, Code Converters, Priority encoders	8
II	<b>Sequential Circuit:</b> Review of flip-flop, Asynchronous counters, Updown counters Synchronous Counters, Shift Registers, State Diagrams.	8
III	<b>Verilog:</b> Design Flow, Modules, Data types, Operators,	4
IV	<b>Modelling:</b> Types, Gate-Level modelling, Data Flow modelling ,Behavioral modelling, Switch Level Modelling.	4
V	<b>Tasks &amp; Functions:</b> Tasks declaration, function declaration, types of functions	4
VI	<b>EDA tools:</b> Study of EDA tool, Implementation of Verilog code using EDA tools,	2

**Total Hrs : 30**

**List of Laboratory Experiments/ Practicals (if applicable)**

1. Introduction to EDA tool with sample experiment in Verilog
2. full adder using half adder as a component
3. Four-bit full adder using 1-bit full adder as a component.
4. Full adder using 8:1 multiplexer as component
5. Full adder using 1:8 demux as component
6. Implementation of 4:1 mux using 2:1 mux as a component
7. Implementation of demultiplexer IC 74138
8. 4-bit comparator
9. Implementation of flip flops
10. Four-bit Counter using D-f/f
11. Counter using operators
12. UP counter and DOWN counter
13. Shift registers
14. Universal Shift register
15. Download procedure using EDA on Spartan Kits

**Course Assessment Plan (for total 60 learning hours)**

CO 1	2	2									
CO 2		2									
CO 3		3			3						
CO 4			3								

  

Module	Module Contents	Hours
I	<b>Sequential Logic Design:</b> Introduction to sequential logic, Level-sensitive latches, Edge-sensitive flip-flops, synchronous and asynchronous circuits, Registers and shift registers, Counters, Algorithmic State Machine (ASM) design, Moore and Mealy machines.	5
II	<b>D/A converter and A/D Converter</b> Ladder type A/D converter, Dual slope A/D converter, Successive approximation A/D converter study of DAC 0800 and Study of ADC 0809 Chips.	5
III	<b>Introduction to Microprocessors:</b> 8085/86 microprocessors: Salient Features, Pin Description, Architecture of 8085/86: Functional Block Diagram, Microprocessor vs Microcontroller. 8085/86 Hardware description, memory Segmentation, Instruction set, addressing modes.	7
IV	<b>Interfacing devices:</b> Assembly Language Programming, interfacing with programmable peripheral devices System structure, I/O interfacing and Timing diagram IN and OUT instructions and Peripheral Interfacing, interfacing with LED, Memory mapped I/O.	7
V	<b>Interrupts:</b> 8085/86 interrupts and its classification, Software interrupts, priorities of interrupts, 8155and 8255 control register and its modes & Sample programs, Case study and Its applications.	6
<b>Total Hrs : 30</b>		

**List of Laboratory Experiments/ Practical's**

1. Functional tables of (i) JK Edge triggered Flip-Flop (ii) JK Master Slav Flip-Flop (iii) D Flip-Flop
2. 4-bit Universal Shift Register.
3. MOD-8 ripple counter using T-Flip-Flops.
4. BCD Adder Circuit.
5. To study the architecture of microprocessor 8085 & 8086 and familiarization with their hardware, commands & operation of microprocessor kit.
6. Assembly language programs.
7. Write a program to interface ADC & DAC with 8085.
8. Write a different program on interfacing with devices.

**Course Assessment Plan (for total 60 learning hours)**

Assessment No.		Formative Assessment type	Brief Description	Marks	Notional Learning hours	Week
ISE	1	Assignments	Topics on digital logic vs. microprocessor systems	20	6	3
	2	Short Quiz / MCQ Test	On sequential logic and ADC/DAC concepts	20	10	6
	3	Seminar	On emerging trends in microprocessor technology	10	5	8
ESE	4	Long Quiz / MCQ Test	On Microprocessor , hardware structure ,peripherals	30	20	12
	5	Mini-Project	Design and simulate a microprocessor-based system	10	10	13
	6	Oral/Viva Exam	On course topics and practical implementations	10	5	14
	8

Module	Module Contents	Hours
I	<b>Principles of Land Surveying</b> Overview of survey levels and their classifications. Levelling methods: Differential levelling, reciprocal levelling, and precise levelling. Surveying instruments: Compass, Theodolite, Total Station, and Tachometer. Applications of surveying in infrastructure development.	3
II	<b>Advanced Surveying Techniques</b> Trigonometric levelling: Concepts and applications. Traversing: Methods, adjustments, and plotting. Triangulation and trilateration: Principles, computations, and applications.	4
III	<b>Coordinate systems</b> Cartesian and geographical map projections and their types: Conformal, equal-area, and equidistant. Map datum: Concepts of MSL (Mean Sea Level), Geoid, spheroid, and WGS-84. Importance of map datum in GIS and engineering applications. Systems and Map Projections	4
IV	<b>Introduction to Maps</b> Definition and significance of maps in engineering projects. Types of maps: Topographical maps, cadastral maps, thematic maps, engineering maps. Scales of maps: large scale, medium scale, small scale, and their applications. Plotting accuracy and precision in map-making. Map sheet numbering and standardization.	5
V	<b>Aerial Photogrammetry</b> Types of aerial photographs: Vertical, oblique, and panoramic. Flying height, scale, and their importance in photogrammetry. Relief displacement and its effects on map accuracy. Introduction to Digital Elevation Models (DEM). Applications of DEM in slope analysis and topographical mapping. Introduction to stereoscopy and creation of 3D models.	5
VI	<b>Global Positioning Systems</b> Introduction to GPS: GPS signal structure, GPS modernization, types of GPS receivers, time systems, pseudo-range measurements, GPS measurements. GPS errors and Biases: GPS ephemeris errors, Selective availability, satellite receiver, and clock error, multipath error, ionospheric error, tropospheric errors Applications: GPS for utilities industry, forestry and natural resources, precision farming.	5
<b>Total Hrs: 30</b>		

## **Tutorial**

### **Tutorial 1: Principles of Land Surveying**

- a. Overview of survey levels and classifications
- b. Levelling methods: Differential, reciprocal, and precise levelling

### **Tutorial 2: Levelling Methods**

- a. Differential levelling: Procedure and accuracy
- b. Reciprocal levelling: Elimination of errors

### **Tutorial 3: Levelling Methods Applications of Surveying in Infrastructure Development**

- a. Road alignment and construction
- b. Bridge and dam site selection

### **Tutorial 4: Advanced Surveying Techniques**

- a. Trigonometric levelling: Concepts and field applications
- b. Traversing: Methods, plotting, and adjustments

### **Tutorial 5: Systems and Map Projections**

- a. Introduction to map projection systems
- b. Importance of map datum in GIS and engineering

### **Tutorial 6: Introduction to Maps**

- a. Definition and significance of maps in engineering projects
- b. Types of maps: Topographical, cadastral, thematic, engineering maps

### **Tutorial 7: Aerial Photogrammetry**

- a. Types of aerial photographs: Vertical, oblique, panoramic
- b. Flying height, scale, and importance in photogrammetry

### **Tutorial 8: Global Positioning Systems (GPS)**

- a. GPS signal structure and modernization
- b. Types of GPS receivers and their applications

### **Tutorial 9: Global Positioning Systems (GPS)**

- a. GPS errors and biases: Ephemeris, selective availability, multipath, ionospheric, tropospheric
- b. Applications of GPS in utilities, forestry, and precision farming

### **Tutorial 10: Revision**

**Course Assessment Plan (for total 60 learning hours)**

Assessment No.		Formative Assessment type	Brief Description	Marks	Notional Learning hours	Week
ISE	1	Group Discussion	Role of precise levelling and modern Total Station surveying in improving infrastructure development quality in India.	10	5	2
	2	Online Quiz/Crossword	Create and attempt an online quiz on: Types of map projections GPS error sources Trigonometric levelling principles	10	10	4
MSE	3	Case Study Presentation	Analyze a real infrastructure project (road/highway/irrigation) and present how surveying (levelling, traversing, triangulation) influenced planning and execution.	10	20	6
	4	Portfolio Preparation	Students must maintain a portfolio including:  Traversing fieldwork records  Levelling calculations  Total Station plotting  GPS coordinate logs	20	5	6
ESE	5	Concept Mapping	Create a concept map showing relationships among:  Levelling - Traversing - Triangulation - Map Projections - GPS - DEM	20	5	12
	6	Article Discussion (Reflection)	Select a research article on Digital Elevation Models and write a reflection on its engineering applications.	10	5	13
	7	Assignment	Solve numerical problems on:  <ul style="list-style-type: none"> <li>● Trigonometric levelling</li> <li>● Bowditch adjustment in traversing</li> <li>● Map projection error calculations</li> </ul>	20	5	13

Module	Module Contents	Hours
I	<p><b>Principles of Drawing:</b></p> <p>Seven Elements Point, line, shape &amp; form, colour, tones, texture and space.</p> <p>Seven principles: Unity, harmony, balance, rhythm, emphasis, proportion and contrast; line quality, contour and continuous line drawing; Free hand drawings.</p>	5
II	<p><b>Types of Drawing:</b></p> <p>Pencil Sketching, Pencil Shading, Cartoon and Anime Drawing, Landscape Drawing, Concepts of Light and Shadow; Types: Paintings, Collage, Mosaic, Etching, Wall-Mural and Sculptures.</p>	5
III	<p><b>Principles of Sketching:</b></p> <p>Basic Sketching Skills Shapes and Objects Drawing, proportion, Measurement and structure, Expression and emotion, Aesthetic composition and grace, Shapes and Objects, Tone and shade.</p>	5
IV	<p><b>Drawing and Sketching Aspects:</b></p> <p>Design and landscape Drawing, Drawings in vertical, horizontal format in 2 and 3 Dimensions, perspective, eye level, fixed point of view, vanishing point, ratio-proportion. Origin and Development, Main features, Characteristics, Aesthetic parameters, Symbolic representation in artworks, Identification of style &amp; technique, Understanding of emotions and moral values.</p>	5
V	<p><b>Art Techniques and Skill Development:</b></p> <p>Development of observation skills for accurate visual representation. Practice of shading and texture techniques such as hatching, cross-hatching and stippling. Introduction to composition principles: balance, focal point, Golden Mean and effective use of negative space.</p>	5

VI	<p><b>Colours and Shades:</b></p> <p>Still-life, landscape, anatomy, abstraction and stylization. Transparent and opaque techniques, Drawing and painting media: Brushes, Paper, Surface, Canvas and Hard-board, Colouring materials: Charcoal, Soft Pastels, Oil Pastels Crayons, Natural Colours, Earth colours Pencil, Water, Acrylic, Poster, Inks etc.</p>	5
	<b>Total Hrs : 30</b>	

**List of Laboratory Experiments/ Practicals (if applicable)**

1. Study of 2/3 different forms in pencil with light and shade from a fixed point of view.
2. Study of 2/3 geometrical forms of objects like cubes, cones, cylinders and spheres etc.
3. Draw sketches of/from different forms.
4. Exercises in pencil with light and shade and in full colour from (point of view).
5. Imaginative painting on subjects in colours with colour values.
6. Draw and paint the still-life of a group of objects.
7. Make use of line, tone and texture, exploiting the medium fully to realize composition.
8. Print your composition in multi-colours.
9. Drawing and colouring of figures and organize in attractive visual compositions.
10. Geometric designs, Poster Designing and logo drawings etc.

**Course Assessment Plan (for total 60 learning hours)**

		<b>Descriptor</b>	<b>Level</b>		
<b>CO1</b>	Explain fundamental cybersecurity concepts, threats, and risks.	Understand	L2		
<b>CO2</b>	Analyze different forms of cyberattacks and their impact	Analyze	L4		
<b>CO3</b>	Evaluate essential security mechanisms such as authentication, access control, and cryptography.	Evaluate	L5		
<b>CO4</b>	Recommend cybersecurity practices for securing systems and networks.	Create	L6		
<b>CO - PO mapping</b>					

Programme Outcomes (PO)											
COs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11
CO 1	3	2	1	1	1						
CO 2	2	3	2	2	2						
CO 3	2	2	3	2	2						
CO 4	1	2	3	2	3	1		1	2	1	
Module	Module Contents										Hours
I	<b>Introduction to Cybersecurity:</b> CIA triad, threat landscape, assets, vulnerabilities, exploits, risk management basics.										5
II	<b>Cyberattacks &amp; Malware:</b> Phishing, ransomware, DoS/DDoS, brute force, SQL injection, malware behavior.										5
III	<b>Authentication &amp; Access Control:</b> Password security, MFA, IAM, RBAC, privilege escalation.										5
IV	<b>Basics of Cryptography:</b> Symmetric/asymmetric encryption, hashing, digital certificates, SSL/TLS.										5
V	<b>Network Security Tools &amp; Techniques:</b> Firewalls, IDS/IPS, VPN, Wi-Fi security, packet inspection.										5
VI	<b>Cyber Hygiene &amp; Protection Measures:</b> Secure configurations, patching, backups, endpoint protection, incident reporting.										5
<b>Total Hrs : 30</b>											

**List of Interaction Sessions**

(Activities for ISE, formative assessments, demos...)

1. Case study: Real-world cyberattack analysis
2. Demonstration of phishing identification
3. Group discussion: Password policies vs usability
4. Risk assessment for a small organization
5. Debate: Privacy vs security
6. Short quiz using online tools
7. Open-book problem-solving activity
8. Concept mapping of cybersecurity ecosystem
9. Report on a popular security breach
10. Small cyber hygiene checklist creation

**Course Assessment Plan (for total 60 learning hours)**

Assessment No.		Formative Assessment type	Brief Description	Marks	Notional Learning hours	Week
ISE	1	Quiz	Short-answer quiz on cybersecurity fundamentals	10	6	3
	2	Case Study Analysis	Analysis of a real cyberattack scenario with findings and recommendations	10	6	6
MSE	3	Design Challenge / Problem-Based Task	Students solve a cybersecurity problem (e.g., propose defense steps, identify vulnerabilities, or secure a small system) and present the solution	30	15	7
ESE	5	End-semester theory exam	written exam on core concepts	40	25	13
	6	Viva / Oral Assessment	oral evaluation on security practices and reasoning	10	8	13
				100	60

**11) Sustainable Energy Transition in India    2    0    1    0    3**

<b>Walchand College of Engineering, Sangli</b> (Government Aided Autonomous Institute)					
<b>AY 2025-26 onwards</b>					
<b>Course Information</b>					
<b>Programme</b>		B. Tech.			
<b>Class, Semester</b>		Second Year B. Tech., Sem. IV			
<b>Course Code</b>		7MD261			
<b>Course Name</b>		Sustainable Energy Transition in India			
<b>Desired Requisites:</b>		Basic knowledge of energy systems, power generation, and sustainability.			
<b>Teaching Scheme</b>		<b>Examination Scheme (Marks)</b>			
<b>Lecture</b>	2 Hrs/week	<b>MSE</b>	<b>ISE</b>	<b>ESE</b>	<b>Total</b>
<b>Interaction</b>	1 Hr /week				
<b>Tutorial</b>	-	30	20	50	100
<b>Practical</b>	-	<b>Credits: 3</b>			
<b>Course Objectives</b>					
<ol style="list-style-type: none"> <li>1. To provide foundational knowledge of India's current energy system, its challenges, and the need for a sustainable transition.</li> <li>2. To develop students' understanding of various renewable energy technologies and enhance their ability to apply these technologies in real-world Indian contexts.</li> <li>3. To enable students to critically analyse national policies, missions, and regulatory frameworks that drive India's sustainable energy transition.</li> <li>4. To equip students with the ability to evaluate clean energy implementation models, challenges, and global best practices for achieving long-term climate and sustainability targets.</li> </ol>					
<b>Course Outcomes (CO)</b>					
<b>CO</b>	<b>Description</b>	<b>Blooms Taxonomy</b>			
		<b>Descriptor</b>	<b>Level</b>		
<b>CO1</b>	Understand India exists energy system and the need for sustainable transition.	Understand	II		
<b>CO2</b>	Explain renewable energy technologies and their deployment in India.	Apply	III		
<b>CO3</b>	Analyze key government policies and programs accelerating energy transition.	Analyze	IV		
<b>CO4</b>	Evaluate challenges and opportunities in achieving India's long-term climate goals.	Evaluate	V		
<b>CO5</b>	Analyze and evaluate clean energy models, best practices, and emerging innovations considering technical, economic, and managerial aspects.	Analyze	VI		
<b>CO-PO mapping</b>					

Programme Outcomes (PO)											
COs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11
CO1	3	2	-	-	-	2	3	-	-		-
CO2	3	2			2	-	3	-	-		-
CO3	2	3	-	2	-	2	3	-	-	2	-
CO4	2	3	-	2	-	2	3	-	-	2	-
CO5	2	3	2	2		2	3	-		2	2
Module	Module Contents										Hours
I	<b>Introduction to Energy Systems in India</b> India's energy landscape: production, consumption, sector-wise distribution, Types of energy sources and classification, Environmental issues with coal & fossil fuels, Sustainable development goals (SDG-7), Need for decarbonization										6
II	<b>Renewable Energy Sources &amp; Technologies</b> Solar: working principle, PV modules, advanced PV technologies, Wind: turbine design, variable-speed & offshore wind turbines, wind potential zones in India, small hydro: potential & limitations, run-of-river and micro-hydro technologies, Hybrid renewable systems, Solar-Wind hybrids, Solar-Storage systems										4
III	<b>Policies &amp; Regulatory Framework</b> Planning, Renewable Purchase Obligation (RPO), Renewable Energy Certificate (REC) Mechanism, Green Open Access Rules, Open Electricity Market (Power Trading, Market-Based Tariff Mechanisms), and Institutional Regulatory Roles (Central & State Electricity Regulatory Commissions)										5
IV	<b>Renewable Energy Missions &amp; Energy Efficiency Initiatives</b> National Solar Mission, National Wind Energy Mission, Green Hydrogen Mission, PM-KUSUM Energy Efficiency, Bureau Programs: UJALA PAT Scheme, STAR Labelling India's commitments under COP21, COP26										5
V	<b>Challenges &amp; Future Pathways</b> Carbon emissions, Intermittency & need for storage Battery technologies, Smart grids & digitalization, Financial, technical & regulatory challenges, Role of EVs in energy transition, Net-zero pathway: India 2070 roadmap										5
VI	<b>Clean Energy Best Practices &amp; Innovations</b> Gujarat RE model (solar rooftop success), Rajasthan large-scale RE projects, International best practices, Future innovations: EV ecosystem development: charging infrastructure and grid impact, Vehicle-to-grid (V2G) and managed charging strategies, green hydrogen production, storage, and utilization, Research, innovation, and industry-academia collaboration										5
<b>Total Hrs: 30</b>											

**Course Assessment Plan** (*for total 60 learning hours*)

T		Formative Assessment type	Brief Description	Marks	Notional Learning hours	Week
ISE 1	1	Digital Poster Making (or Sketching) and Presentation	Assess understanding of India's energy landscape (CO1, CO2) Students create a digital poster OR hand-drawn sketch on: <ul style="list-style-type: none"> <li>• Energy transition</li> <li>• Renewable potential</li> <li>• Case study visualization</li> </ul> Creativity (3), Technical clarity (4), Presentation (3)	<b>10</b>	<b>10 hours</b> (4 hrs research, 4 hrs designing, 2 hrs presentation)	Week 3-4
ISE 2		Quiz, Crossword etc. using online tools	Continuous assessment of Modules I-III (CO1, CO2, CO3) Google Forms quizzes, crossword puzzles, short-answer assignments Accuracy (5), Concept clarity (5)	<b>10</b>	<b>10 hours</b>	Week 5-6
MSE	2	Certification course of 10-12hr duration on platform like coursera /Udemy/NPTEL	Strengthen technical skills in renewable energy (CO2, CO3) NPTEL / Coursera / Udemy "Solar Energy Basics", "Wind Energy", "Energy Transition & Climate Policy" Certificate completion + short reflective summary	<b>30</b>	<b>14 hours</b>	Week 7-8

ESE	3	Community Engagement Project in chosen field	<p><b>Option A: Community Engagement Project (Recommended)</b> Students work in the field &amp; prepare a report on:</p> <ul style="list-style-type: none"> <li>• Solar rooftop survey</li> <li>• Local energy consumption audit</li> <li>• Awareness programs on energy saving</li> <li>• EV charging mapping in the locality</li> </ul> <p><b>Option B: Case Study Presentation</b> Deep-dive analysis of any model:</p> <ul style="list-style-type: none"> <li>• Gujarat RE Model</li> <li>• Delhi EV Policy</li> <li>• Jaisalmer Wind Park</li> <li>• International best practices (Germany/China/Denmark )</li> </ul> <p>Field activity / data collection (10 M) technical analysis (CO3, CO4, CO5) (20 M) Report writing (10 M) Viva / Presentation (10 M)</p>	50	26 hours	Week 10-12
			Total	100	60 hrs

**14) Project Management for Infrastructure Development 2 0 1 0**  
3

Walchand College of Engineering, Sangli (Government Aided Autonomous Institute)													
AY 2025-26 onwards													
Course Information													
<b>Programme</b>		B. Tech.											
<b>Class, Semester</b>		S. Y. B. Tech., Sem: IV											
<b>Course Code</b>		7MD264											
<b>Course Name</b>		Project Management for Infrastructure Development											
<b>Desired Requisites:</b>													
Teaching Scheme		Examination Scheme (Marks)											
<b>Lecture</b>	2 Hrs/week	<b>MSE</b>	<b>ISE</b>	<b>ESE</b>	<b>Total</b>								
<b>Interaction</b>	1 Hr /week												
<b>Tutorial</b>	-	30	20	50	100								
<b>Practical</b>	-	<b>Credits: 3</b>											
Course Objectives													
1. Provide students with a comprehensive understanding of project management principles, methodologies, and techniques 2. Deliver theoretical knowledge and practical insights into project planning, scheduling, cost management, quality control, and risk management in construction projects. 3. Equip students with the skills necessary to effectively plan, execute, and control construction projects, considering factors such as time, cost, quality, and stakeholder expectations.													
Course Outcomes (CO)													
CO	Description	Blooms Taxonomy											
		Descriptor	Level										
CO1	Recall and comprehend the fundamental principles and concepts of construction project management.	Analyse	IV										
CO2	Apply project management tools and techniques to plan, schedule, and control construction projects.	Apply	III										
CO3	Critically evaluate and assess the performance of construction projects using project management metrics.	Evaluate	V										
CO - PO mapping													
		Programme Outcomes (PO)											
	COs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	
	CO1										2	3	
	CO2	1				2						2	
	CO3	2	1				3		2		2		
Module	Module Contents												Hours

I	<p><b>Introduction to Project Management</b> Overview of project management project: unique features, types, phases, and role in economic development Ethical conduct for civil engineers: importance, professional codes of ethics, and ethical decision-making, Project life cycle and stakeholders, Roles and responsibilities of a construction project manager, construction project management processes</p>	4
II	<p><b>Project Planning and Scope Management</b> Importance of Construction Project Planning, Defining Project Objectives and Scope Work Breakdown Structure (WBS), Activity Sequencing and Dependency Relationships Estimating Activity Durations, Construction Project Scheduling Techniques-Introduction to project scheduling techniques Critical Path Method (CPM) and its applications in construction projects Developing project schedules using network diagrams Identifying critical activities and calculating float/slack Incorporating PERT analysis into project schedules</p>	6
III	<p><b>Construction Materials Management and Cost Management:</b> Introduction to Materials Management, Material Procurement and Supplier Selection Inventory Management and Control Principles of inventory management in construction projects, Inventory control techniques (e.g., just-in-time, ABC analysis) Material handling and storage practices, Testing and inspection methods for construction materials, Quality assurance practices and standards, introduction to ERP systems and their role in materials management, Importance of cost codes for effective cost tracking and control, Time-Cost Trade-Off in Construction Projects, Principles and techniques of cost planning in construction projects, Value engineering and value analysis techniques</p>	7
IV	<p><b>Project Monitoring and Control</b> Introduction to Project Monitoring and Control, Performance Measurement and Tracking, Earned Value Management (EVM), Management Information Systems (MIS) in Project Monitoring and Control, Communication and Reporting.</p>	4
V	<p><b>Quality Management</b> Introduction to Quality Management, Quality Planning and Assurance, Introduction to Total Quality Management (TQM) principles and concepts, Application of TQM in construction projects, Quality improvement methodologies in TQM</p>	5
VI	<p><b>Project Risk Management</b> Risk identification, assessment, and prioritization, Risk response planning and implementation, Risk monitoring and control. Contingency planning and mitigation strategies</p>	4
<b>Total Hrs : 30</b>

**16) Foundations of Quantum Computing      2      0      1      0      3**

<b>Walchand College of Engineering, Sangli</b> (Government Aided Autonomous Institute)					
<b>AY 2025-26 onwards</b>					
<b>Course Information</b>					
<b>Programme</b>		B. Tech. (MDM - Quantum Technology)			
<b>Class, Semester</b>		SY B. Tech., Sem. IV			
<b>Course Code</b>		7MD266			
<b>Course Name</b>		Foundations of Quantum Computing			
<b>Desired Requisites:</b>		Familiarity with Boolean Logic, Linear Algebra and Probability			
<b>Teaching Scheme</b>		<b>Examination Scheme (Marks)</b>			
<b>Lecture</b>	2 Hrs/week	<b>MSE</b>	<b>ISE</b>	<b>ESE</b>	<b>Total</b>
<b>Interaction</b>	1 Hr /week				
<b>Tutorial</b>	-	30	20	50	100
<b>Practical</b>	-	<b>Credits: 3</b>			
<b>Course Objectives</b>					
<ol style="list-style-type: none"> <li>1. Introduce the mathematical foundations required for quantum technologies, including complex vector spaces, tensor products, and operator theory.</li> <li>2. Develop an understanding of qubit systems, quantum states, Bloch sphere representation, and the distinction between pure and mixed states.</li> <li>3. Provide practical skills in building and analyzing quantum circuits using modern quantum programming tools (e.g., Qiskit), including handling noise and basic communication protocols.</li> </ol>					
<b>Course Outcomes (CO)</b>					
<b>CO</b>	<b>Description</b>	<b>Blooms Taxonomy</b>			
		<b>Descriptor</b>	<b>Level</b>		
<b>CO1</b>	Apply mathematical concepts such as complex vectors, Dirac notation, tensor products, and operator properties to describe and analyze quantum states and transformations.	Understand	II		
<b>CO2</b>	Represent and interpret single-qubit and multi-qubit states using statevectors, density matrices, and Bloch sphere geometrical interpretation.	Apply	III		
<b>CO3</b>	Construct and simulate quantum circuits using fundamental and multi-qubit gates (X, Y, Z, H, RX, RY, RZ, CNOT) and demonstrate entanglement, interference, and basic quantum communication protocols.	Create	VI		
<b>CO4</b>	Analyze outcomes of quantum measurements, evaluate circuit behavior under different measurement bases, and assess circuit performance under realistic noise models using Qiskit.	Evaluate	V		
<b>CO - PO mapping</b>					

Programme Outcomes (PO)											
COs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11
CO 1	3	3	2	2	2						2
CO 2	3	2	2	2	3						2
CO 3	2	2	3	3	3			2	2	2	2
CO 4	2	3	2	3	3			2	2	2	3
Module	Module Contents										Hours
I	<b>Mathematical Preliminaries:</b> Complex numbers, vectors, Dirac notation, Inner products, orthogonality, Tensor products: multi-dimensional states, Matrix representations of operators, Unitary and Hermitian operators.										3
II	<b>Qubits &amp; State Representation:</b> Classical bit vs qubit, Single-qubit states $ 0\rangle,  1\rangle$ , superposition, Bloch sphere representation, Global vs relative phase, Density matrices (intro), Mixed states vs pure states										3
III	<b>Quantum Gates:</b> Unitary transformations and quantum gates, Pauli gates (X, Y, Z), Hadamard and phase gates (H, S, T), Rotation gates: RX, RY, RZ, Multi-qubit gates: CNOT, Controlled gates: CZ, CCNOT (Toffoli), Universal gate sets, Circuit diagrams and decomposition basics										4
IV	<b>Multi-Qubit Systems &amp; Entanglement:</b> Tensor product for 2-qubit systems, Bell states, Entanglement measures (qualitative), Quantum interference, Superdense coding, Quantum teleportation, No-cloning theorem										3
V	<b>Quantum Measurement Theory:</b> Measurement postulates, Observable operators, Born rule and probabilities, Measurement in different bases, Collapse of wavefunction and implications.										3
VI	<b>Quantum Circuits &amp; Computation Model:</b> Quantum circuit model, Gate-level circuit construction, Time evolution and unitaries, Circuit depth and size, Reversible computing foundations, Introduction to noise & real hardware limitations.										4
<b>Total Hrs :</b>											<b>20+10=30</b>

Assessment No.		Formative Assessment type	Brief Description	Marks	Notional Learning hours	Week
ISE	1	Quiz + Coding/Simulation Task	Short quiz on quantum preliminaries + simple Qiskit coding (state preparation, single-qubit gates)	10	7 hrs	3
	2	Case Study / Presentation	Group presentation on quantum applications (ex: quantum cryptography, quantum sensing, QML) with justification of quantum advantage	10	7 hrs	5
MSE	3	Mid-Semester Examination	Written test covering Modules I-III (theory + short numericals)	30	12 hrs	7
ESE	4	Practical Evaluation	Hands-on Qiskit implementation of quantum gates	15	9 hrs	10
	5	Quantum Mini-Project	Small project implementing protocols like coding / demonstration □ result interpretation	15	9 hrs	11
	6	Viva-Voce / Oral Examination	Oral exam covering circuits, interference, measurement, hardware	10	6 hrs	12
	7	Portfolio / Reflection Activity	Submission of Qiskit portfolio (circuit diagrams, output screenshots, observations, reflections)	10	10 hrs	14
<b>Total</b>				<b>100</b>	<b>60 hrs</b>

<b>Course Objectives</b>					
<p>After completing this course, students will be able to:</p> <ul style="list-style-type: none"> <li>● <b>Understand</b> fundamental management principles and their role in fostering innovation and entrepreneurial initiatives within organizations.</li> <li>● <b>Develop</b> an entrepreneurial mindset grounded in values, motivation, creativity, and ethical decision-making.</li> <li>● <b>Apply</b> structured creativity, critical thinking, and problem-solving tools to identify innovation opportunities and generate viable solutions.</li> <li>● <b>Analyse and manage</b> opportunities and risks to create sustainable value through systematic innovation processes.</li> </ul>					
<b>Course Outcomes (CO)</b>					
CO	Description	Blooms Taxonomy			
		Descriptor	Level		
CO1	<b>Explain</b> classical and contemporary management concepts and their relevance in supporting innovation and entrepreneurial culture.	Understand	I		
CO2	<b>Apply</b> creativity, critical thinking, and structured problem-solving techniques to generate and refine innovative ideas.	Apply	III		
CO3	<b>Analyse</b> opportunities and risks using market insights, user needs, and feasibility tools to evaluate innovation potential.	Analyse	IV		
CO4	<b>Design and justify</b> value-creating solutions using design thinking, prototyping, and evidence-based experimentation.	Create	V		

**CO - PO mapping**

CO \ PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11
CO1	2	1	1	-	-	1	1	-	-	3	2
CO2	2	3	2	1	2	-	-	1	-	-	2
CO3	1	3	2	2	1	2	-	-	-	1	2
CO4	1	2	3	2	2	2	1	2	1	2	2

Module	Module Contents	Hours
I	<p><b>Foundations of Management and Innovation</b> Covers classical and modern management theories, emphasizing planning, organizing, leading and controlling within innovative environments. Explains how management principles support creativity, experimentation and structured innovation. Introduces organizational culture that encourages idea generation and continuous improvement. Highlights the importance of management systems in nurturing entrepreneurial initiatives.</p>	5
II	<p><b>Entrepreneurial Mindset, Values and Motivation</b> Explores key entrepreneurial values such as resilience, integrity, ownership and learning orientation. Emphasizes the mindset needed to innovate, challenge assumptions and navigate uncertainty. Helps students recognise their own strengths and motivations as emerging innovators. Connects entrepreneurial behaviour with long-term value creation.</p>	5
III	<p><b>Creativity, Critical Thinking and Problem-Solving for Innovation</b> Focuses on how to think creatively using structured tools like brainstorming, SCAMPER and mind-mapping to generate novel solutions. Introduces critical thinking approaches for analysing problems, identifying root causes and evaluating ideas objectively. Demonstrates importance of first-principles thinking in innovative product development. Shows how creativity becomes a systematic process rather than accidental inspiration.</p>	5
IV	<p><b>Opportunity Identification and Innovation Relevance</b> Explains how innovators discover unmet needs through observation, user empathy and market analysis. Demonstrates the link between creativity and opportunity recognition by converting problems into viable ideas. Highlights the importance of innovation in driving competitive advantage and societal impact. Introduces tools for assessing opportunity size, relevance and feasibility.</p>	5

V	<b>Value Creation and Innovation Design</b> Shows how innovators convert ideas into meaningful value through design thinking and customer-centric development. Emphasizes understanding user pains, gains and jobs-to-be-done to craft strong value propositions. Explores the importance of rapid prototyping, MVPs and feedback loops in refining solutions. Demonstrates how innovation contributes to long-term value for users, markets and communities.	5
VI	<b>Risk, Uncertainty and Strategic Opportunity Management</b> Covers types of entrepreneurial risks—market, financial, technical and operational—and methods to analyse them. Explains how innovators manage uncertainty through experimentation, validation and early testing. Shows how opportunity and risk coexist, requiring evidence-based decision making. Reinforces that successful innovation arises from calculated risk-taking aligned with strategic vision.	5

<b>Lecture</b>	2 Hrs/week	<b>MSE</b>	<b>ISE</b>	<b>ESE</b>	<b>Total</b>
<b>Interaction</b>	1 Hr /week				
<b>Tutorial</b>	-	30	20	50	100
<b>Practical</b>	-	<b>Credits: 3</b>			
<b>Course Objectives</b>					
<ul style="list-style-type: none"> <li>Study the key components of EVs, such as batteries, electric motors, inverters, charging systems, and energy management systems.</li> <li>Gain knowledge of the electric powertrain, including electric motors, controllers, and battery management systems.</li> <li>Investigate the global market trends for EV adoption, including government incentives, market barriers, and consumer behaviour</li> </ul>					
<b>Course Outcomes (CO)</b>					
<b>CO</b>	<b>Description</b>	<b>Blooms Taxonomy</b>			
		<b>Descriptor</b>	<b>Level</b>		
<b>CO1</b>	Learn the basics of EVs, including their components, how they differ from internal combustion engine (ICE) vehicles, and their importance	Understand	II		
<b>CO2</b>	Design and analyse the electric powertrain system of an EV, including electric motor selection, inverter design, and drivetrain integration.	Analyse	III		
<b>CO3</b>	Evaluate the performance characteristics of electric vehicles, including acceleration, braking, and overall efficiency, and relate these to vehicle design parameters.	Evaluate	V		
<b>CO - PO mapping</b>					

<b>Programme Outcomes (PO)</b>											
COs	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO11
CO 1	3									1	
CO 2		3	3	1					3		
CO 3	2	2		3			2				

  

Module	Module Contents	Hours
I	<b>Background Details to Electric Vehicle (EV)</b> EV Historical Background, EV Benefits of Using EVs, EV Overview of types of EVs and its Challenges, EV Motor Drive Technologies, EV Energy Source Technologies	4
II	<b>Electric Vehicle Dynamics (Subsystems and Configuration)</b> EV Subsystems and Modes of Operation, Vehicle Dynamics intro and tractive effort Configuration locomotive drives- series parallel switching- load tracking architecture. Mild hybrid- power assist- dual mode- power split- power split with shift, Continuously Variable transmission (CVT)- wheel motors.	6
III	<b>Electrical &amp; Electronic Components</b> Purpose and operation of electrical components like switches, relays, solenoids etc. Purpose of circuit protection devices like fuses, circuit breakers and fusible links. Working of Electromagnetic gauges like temp Gauges, fuel gauge, engine oil pressure gauge, Speedo-meter gauge. Working of electrical accessories like windshield wiper, washer pumps, electrochromic mirror, power window, power seat, power door lock.	5
IV	<b>Clutches, Gear Box and Final Drive</b> Principle, functions, general requirements, types of clutches Necessity of gear box, Requirements of gear box, Functions of gear box, Types of gears used in transmission, Gear shifting mechanism. Propeller shaft, universal joints, hooks and constant velocity joints, Drive line arrangements -Different types of final drives, need of differential.	4
V	<b>Battery (Fuel Cells)</b> Lead acid battery-components & operation. Maintenance free battery-construction. Concept of Low maintenance battery. Battery maintenance and safety precautions. Battery testing-Battery terminal test, Leakage test, Open circuit test, Capacity test. Battery charging-Initial charging procedure, dry charged battery precautions. Jump Starting-Procedure and precautions. Factors affecting battery life. Battery failures-cycle failure, internal short circuit, over charging.	6

VI	<p><b>Brake, Steering and Suspension System</b></p> <p>Concept, function, working principle and necessity of brakes. Classification of brakes and braking systems. Electrical braking systems. Concept, function, working principle of Steering system. Electric power steering system (EPS) and its components. Concept, function, working principle and necessity of suspension system (ESS), electronic suspension system (ESS)</p>	5
	<b>Total Hrs : 30</b>	

**Course Assessment Plan (for total 60 learning hours)**

		Formative Assessment type	Brief Description	Marks	Notional Learning hours	Week
ISE	1	Quiz + Case Study	Quiz + Case-based Assignment (Module I & II)	10	6	3
	2	Design Challenge + Concept Map	Design Challenge + Concept Map (Module III)	10	6	6
MSE	3	Open Book + Critical Problem	Open Book Exam + Analytical Problems (Modules I-III)	30	12	8
	4	Mini Project / Prototype	Mini Project / Prototype (Modules IV & V)	15	10	11
ESE	5	Viva + Seminar	Viva/Oral + Seminar (Modules I-VI)	10	6	12
	6	Open Book Theory Exam	Final Theory Examination (Modules I-VI)	25	20	14
<b>Total</b>				<b>100</b>	<b>60 hrs</b>

**Walchand College of Engineering, Sangli**  
(Government-Aided Autonomous Institute)

**20) Introduction to Financial Markets 2 0 1 0 3**

<b>Walchand College of Engineering, Sangli</b> (Government Aided Autonomous Institute)					
<b>AY 2025-26 onwards</b>					
<b>Course Information</b>					
<b>Programme</b>		MDM in FinTech			
<b>Class, Semester</b>		S Y B. Tech. SEM-IV			
<b>Course Code</b>		7MD270			
<b>Course Name</b>		Introduction to Financial Markets			
<b>Desired Requisites:</b>					
<b>Teaching Scheme</b>		<b>Examination Scheme (Marks)</b>			
<b>Lecture</b>	2 Hrs/week	<b>MSE</b>	<b>ISE</b>	<b>ESE</b>	<b>Total</b>
<b>Interaction</b>	1 Hr /week				
<b>Tutorial</b>	-	30	20	50	100
<b>Practical</b>	-	<b>Credits: 3</b>			
<b>Course Objectives</b>					
<ol style="list-style-type: none"> <li>To develop a strong foundation in basic accounting principles, concepts, and financial reporting.</li> <li>To provide a comprehensive understanding of financial statements, financial ratios, and their interpretation for decision-making.</li> <li>To introduce students to the structure, functions, and regulatory framework of financial markets in India.</li> <li>To equip learners with knowledge of key capital market instruments – equity, debt, mutual funds, and alternative investments – along with their valuation and risk-return characteristics.</li> </ol>					
<b>Course Outcomes (CO)</b>					
CO	Description	Blooms Taxonomy			
		Descriptor	Level		
CO1	Apply fundamental accounting principles to record transactions, prepare ledgers, and generate basic financial statements.	Apply	3		
CO2	Analyse and interpret balance sheets, profit & loss accounts, cash flow statements, and financial ratios for evaluating financial performance.	Analyse	4		
CO3	Explain the functioning of financial markets and the role of key regulators such as SEBI and RBI in maintaining market stability.	Understand	2		
CO4	Differentiate between equity, debt, mutual funds, and alternative investment products and evaluate investment options based on risk, return, and market conditions.	Evaluate	5		
<b>CO - PO mapping</b>					

<b>Programme Outcomes (PO)</b>											
COs	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO11
<b>CO 1</b>	3	2				2	2				
<b>CO 2</b>	3	2	2			2	2				
<b>CO 3</b>	3	3	2								
<b>CO 4</b>	2	3	2			2	2				
Module	Module Contents										Hours
I	Basics of Accounting – Principles and Concepts Financial Accounting: Key accounting principles and concepts, significance of accounting. Accrual vs. cash accounting, double-entry bookkeeping. Overview of the accounting cycle: Journal, ledger, trial balance.										4
II	Financial Statements and Ratios, Understanding financial statements: Balance Sheet, Profit & Loss Account, and Cash Flow Statement. Financial ratios and their implications: Liquidity, profitability, and leverage ratios. Practical exercises: Preparing basic financial statements										6
III	Overview of financial systems: Intermediaries, regulators, and participants. Functions of financial markets: Allocation of resources, risk management, and price discovery. Types of financial markets: Money Market vs. Capital Market; Primary vs. Secondary Market. Regulatory Framework in India: Role of SEBI and RBI.										5
IV	Capital Market Instruments – Equity, Equity instruments: Share and Stock Market operations - IPOs, FPOs, stock exchanges, indices, and trading mechanisms, Key factors influencing equity prices, Risk-return trade-off in equity investments.										5
V	Capital Market Instruments – Debt, Debt instruments: Bonds, debentures, and fixed-income securities. Bond valuation, yield, maturity, and duration.										5
VI	Mutual Funds and Alternative Investments, Overview of mutual funds: Structure, types, and advantages. Net Asset Value (NAV) and fund performance metrics. Introduction to alternative investments: Real estate, commodities, private equity and hedge funds. Fund Types: Active vs. Passive, ETFs, Index Funds										5

**21) Fundamentals of Robotics and Automation      2      0      1      0      3**

<b>Walchand College of Engineering, Sangli</b> (Government Aided Autonomous Institute)					
<b>AY 2025-26 onwards</b>					
<b>Course Information</b>					
<b>Programme</b>		MDM in Robotics and Automation			
<b>Class, Semester</b>		SY B. Tech., Sem IV			
<b>Course Code</b>		7MD271			
<b>Course Name</b>		Fundamentals of Robotics and Automation			
<b>Desired Requisites:</b>		working knowledge of core scientific principles, specifically in Physics and Mathematics, The ability to observe, interpret, and critically understand complex systems and information.			
<b>Teaching Scheme</b>		<b>Examination Scheme (Marks)</b>			
<b>Lecture</b>	2 Hrs/week	<b>MSE</b>	<b>ISE</b>	<b>ESE</b>	<b>Total</b>
<b>Interaction</b>	1 Hr/ Week				
<b>Tutorial</b>	-	30	20	50	100
<b>Practical</b>	-	<b>Credits: 3</b>			
<b>Course Objectives</b>					
<ol style="list-style-type: none"> <li>1. To understand the fundamentals of Robotics.</li> <li>2. To learn the working of- Sensors, End Effectors, Drives.</li> <li>3. To learn the basics of Drives and Power Transmission Systems in Robotics.</li> <li>4. To learn basics of Automation and Material Handling Systems.</li> </ol>					
<b>Course Outcomes (CO)</b>					
<b>CO</b>	<b>Description</b>	<b>Blooms Taxonomy</b>			
		<b>Descriptor</b>	<b>Level</b>		
<b>CO1</b>	Recall fundamentals of Robot Anatomy, Sensors, End Effectors, Drives and Power Transmission.	I	Remembering		
<b>CO2</b>	Explain the Components, working of Robot Components, Sensors, End Effectors, Power Transmission and Drives.	II	Understanding		
<b>CO3</b>	Select appropriate Sensors, End Effectors, Drives and Transmission Elements.	III	Applying		
<b>CO4</b>	Select appropriate components of robotics and automation, automated material handling systems.	III	Applying		
<b>CO - PO mapping</b>					

Programme Outcomes (PO)											
COs	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO11
CO 1	3					1					
CO 2	3	1				1					
CO 3	3	2	2			1					
CO 4	3	2	2			1	1				1

  

Module	Module Contents	Hours
I	<b>Fundamentals of Robotics</b> Historical development of Robotics, Definitions of Industrial Robot, Types and Classification of Robots, Asimov’s laws of robotics, Robot configurations, Robot Components, Robot Degrees of Freedom, Work volume and work envelope, Robot Joints and symbols, Resolution, accuracy and precision of robot.	5
II	<b>Sensors in Robotics</b> Sensor characteristics, Position sensors, Encoders, Velocity sensors, Proximity sensors, Limit switches, Tactile sensors, Force and torque sensors, Safety Sensor: Light Curtain, Laser Area Scanner, Safety Switches, Introduction to machine vision.	5
III	<b>End Effectors</b> Grippers, Mechanical Grippers, Pneumatic and Hydraulic- Grippers, Magnetic Grippers, Vacuum Grippers; Two Fingered and Three Fingered Grippers; Internal Grippers and External Grippers; Advance Grippers- Adaptive grippers, Soft Robotics Grippers, Tactile Sensor Grippers; Various process tools as end effectors; Robot end effectors interface, Active and passive compliance, Selection and Design Considerations.	5
IV	<b>Robot Drives and Power Transmission</b> Robot drive systems, Types - Pneumatic, Hydraulic, Mechanical, Electrical Drives, Salient Features, Applications and Comparison of all these Drives, Micro actuators, selection of drive, Power Transmission used in Robotics.	5
V	<b>Automation</b> Definition, reasons for automating. Types of production and types of automation, levels of automation, Basic elements of automated systems- power, program and control.	5
VI	<b>Material Handling Systems</b> Material handling introduction, Unit Load, Palletizing, Material Transport Equipment automated guided vehicles (AGV), Rail-Guided Vehicles(RGV), Conveyors- Types of Conveyors, Pick and Place Robots.	5
<b>Total Hrs : 30</b>

**22) Electronic Devices and Circuits    2    0    1    0    3**

**Walchand College of Engineering, Sangli**  
(Government Aided Autonomous Institute)

**AY 2025-26 onwards**

**Course Information**

<b>Programme</b>	MDM in Electronics Engineering
<b>Class, Semester</b>	Second Year B. Tech., Sem.-IV
<b>Course Code</b>	7MD272
<b>Course Name</b>	Electronic Devices and Circuits
<b>Desired Requisites:</b>	Basic Electrical and Electronics Engineering

**Teaching Scheme**

**Examination Scheme (Marks)**

		MSE	ISE	ESE	Total
<b>Lecture</b>	2 Hrs/week				
<b>Interaction</b>	1 Hr /week				
<b>Tutorial</b>	-	30	20	50	100
<b>Practical</b>	-	<b>Credits: 3</b>			

**Course Objectives**

1. To explain the working of diode circuits and electronic circuits like small signal amplifiers, power amplifiers using BJT and MOSFETs.
2. To illustrate the methods used for AC/DC analysis of transistorized and op-amp based circuits.
3. To Explain the working of power semiconductor devices and electrical power converter circuits.
4. To explain the working of oscillators, multivibrators, timing circuits and voltage regulators.

**Course Outcomes (CO)**

CO	Description	Blooms Taxonomy	
		Descriptor	Level
CO1	<b>Explain</b> the working of diode circuits, transistorized and op-amp based circuits.	Understand	II
CO2	<b>Explain</b> the working of power semiconductor devices such as SCR, GTO, Power MOSFET and IGBT and power electronics circuits.	Understand	II
CO3	<b>Explain</b> the working of oscillators, multivibrators and applications of operational amplifier in analog computations.	Understand	II
CO4	<b>Solve</b> the examples on diode circuits, amplifiers, voltage regulators and op-amp based circuits considering ideal op-amp.	Applying	III

**CO - PO mapping**

Programme Outcomes (PO)											
COs	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO11
CO 1	2	3									
CO 2	2	3									
CO 3		3	3								
CO 4			3								
Module	Module Contents										Hours
I	<b>Diode Circuits:</b> Rectifier circuits, RC filter circuit, Zener diode voltage regulator, voltage multiplier circuits, diode logic circuits, photodiode and LED circuits.										4
II	<b>Transistorized Amplifiers:</b> Amplifier fundamentals, small signal amplifiers: common emitter amplifier, common collector amplifier; JFET/MOSFET common source/ common drain amplifier, frequency response of amplifiers.										7
III	<b>Power Amplifiers</b> Classification of power amplifiers: class-A, class-B, class-AB, class-C power amplifiers; transformer-coupled amplifiers, heat sink and its operation										5
IV	<b>Op-Amp Applications:</b> Differential amplifier, unity gain buffer (voltage follower), voltage comparator, zero crossing detector, effect of positive feedback, Schmitt trigger circuit, multivibrators, types of oscillators, RC oscillators, monolithic timers (IC555).										6
V	<b>Power Semiconductor Devices and Circuits:</b> SCR, TRIAC, DIAC, GTO, Power MOSFET and IGBT; controlled rectifiers, ac voltage controllers, inverter, chopper, UPS,										4
VI	<b>Regulated DC Power Supply:</b> Block diagram of regulated dc power supply, Zener diode voltage regulator, op-amp based voltage regulator, three terminal IC voltage regulator, switching regulators.										4
<b>Total Hrs : 30</b>											
<b>Course Assessment Plan (for total 60 learning hours)</b>											

Assessment No.		Formative Assessment type	Brief Description	Marks	Notional Learning hours	Week

I	<b>Introduction</b> Basic Concepts: Algorithm, Pseudo-code, ADT, Data Structure, Algorithmic Efficiency, And Recursion, Dynamic Memory allocation, Introduction of Pointers to Arrays ,functions and Structures	4
II	<b>Linear Lists, Stacks and Queues</b> Sequential and linked implementations, equivalence problem, linked lists, doubly linked lists, circular lists	5
III	<b>Non-Linear Structures</b> Basic terminology, binary trees and its representation, binary tree traversals , operations	5
IV	<b>Searching and Sorting Techniques:</b> Importance of searching, Sequential, Binary, Insertion Sort, Bubble Sort, Quick sort and Merge sort	6
V	<b>Introduction to Computer Algorithm</b> Design and Analysis of Algorithm Greedy Algorithms: Knapsack problem, Huffman codes, Dynamic Programming	5
VI	<b>Backtracking Programming</b> Concept, Advantages & Disadvantages, Applications, Implementation using problems like N-Queen Problem	5

**Total Hrs : 30**

**List of Laboratory Experiments/ Practicals (if applicable)**

1. Program based on structures and pointers in C
2. Program based on arrays and pointers in C
3. File handling and command line arguments
4. Implementation of recursive and non-recursive tree traversals
5. Implementation of searching : linear search, binary search, Fibonacci search
6. Sorting Methods: Insertion sort, shell sort, heap sort, quick sort, merge sort, radix sort etc.
7. write a program using Greedy algorithm to compute maximum profit in fractional knapsack.
8. Write a program using Greedy algorithm to compute maximum profit in fractional knapsack.

**Course Assessment Plan (for total 60 learning hours)**

Assessment No.		Formative Assessment type	Brief Description	Marks	Notional Learning hours	Week
ISE	1	Design of Experiment	Design & implement structures and pointers program in C	10	6 hrs	Week 2
	2	Quiz / Crossword using Online Tools	Quiz on Linear Lists, Stacks, Queues & linked implementations	10	6 hrs	Week 4
MSE	3	Case Study Presentation	Case study on Binary Tree representation & operations	15	8 hrs	Week 6
	4	App / Website Making	Mini Web/App demonstrating Searching & Sorting visualizer	15	8 hrs	Week 8
ESE	5	Online Coding Challenge	Participation on HackerRank / LeetCode solving problems on Greedy Algorithms (Knapsack, Huffman) & Dynamic Programming	20	10 hrs	Week 10
	6	Internal Coding Competition	Internal coding competition in group of 3 for dynamic programming	10	5 hrs	Week 11
	7	Assignments	Assignment on Backtracking applications	10	6 hrs	Week 12
	8	Final Assignment + Viva / Demonstration	End-semester project-based practical including complete syllabus	10	5 hrs	Week 13
<b>Total</b>				<b>100</b>	<b>60 hrs</b>

<b>Walchand College of Engineering, Sangli</b> (Government Aided Autonomous Institute)					
<b>AY 2025-26 onwards</b>					
<b>Course Information</b>					
<b>Programme</b>		MDM in Computer Science Engineering			
<b>Class, Semester</b>		SY B. Tech., Sem IV			
<b>Course Code</b>		7MD274			
<b>Course Name</b>		Data Structures and Algorithms			
<b>Desired Requisites:</b>		Programming basics			
<b>Teaching Scheme</b>		<b>Examination Scheme (Marks)</b>			
<b>Lecture</b>	2 Hrs/week	<b>MSE</b>	<b>ISE</b>	<b>ESE</b>	<b>Total</b>
<b>Interaction</b>	-				
<b>Tutorial</b>	-	30	20	50	100
<b>Practical</b>	2 Hrs /week	<b>Credits: 3</b>			
<b>Course Objectives</b>					
<ol style="list-style-type: none"> <li>To develop and improve logical thinking and to make the students capable of applying appropriate data structure for solving a given problem.</li> <li>To explain and demonstrate different algorithm techniques for solving real world problem.</li> <li>To provide a foundation to analyse and compare various searching and sorting techniques and to select optimal techniques to solve the problem.</li> </ol>					
<b>Course Outcomes (CO)</b>					
<b>CO</b>	<b>Description</b>	<b>Blooms Taxonomy</b>			
		<b>Descriptor</b>	<b>Level</b>		
<b>CO1</b>	To describe the fundamental concepts of linear data structures and algorithm design, analysis techniques.	II	Understanding		
<b>CO2</b>	To apply knowledge of computing and mathematics, data structures to solve the problems.	III	Applying		
<b>CO3</b>	To analyze the various algorithm design techniques for a given problem.	IV	Analyzing		
<b>CO4</b>	To assess various data structures and algorithms.	V	Evaluating		
<b>CO - PO mapping</b>					

Programme Outcomes (PO)											
COs	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO1 0	PO1 1
<b>CO 1</b>	2										
<b>CO 2</b>	2	3	2								
<b>CO 3</b>	2	3	2								
<b>CO 4</b>	2	2	2	2							
Module	Module Contents										Hours
I	<b>Introduction to Data structure and Algorithms</b> Introduction, Data Structure, Types, ADT, Design of Algorithms, Performance Analysis, Recurrence Equations: Solution of Recurrence Equations-Iteration Method and Recursion Tree Methods, Towers of Hanoi										4
II	<b>Linked Lists</b> Concept of linear data structure, Singly linked list, doubly linked list, circular linked list, Operations such as insertion, deletion, inversion, concatenation, computation of length, traversal on linked list, Representation of polynomials using linked lists.										5
III	<b>Stacks and Queues</b> Fundamentals of stack and queue as ADT, Representation and Implementation of stack and queue using sequential and/or linked organization, Types, Application of stack and queue										4
IV	<b>Tree and Graph</b> Basic concepts, representation of tree and graph in memory, traversal, applications										5
V	<b>Divide and Conquer Method</b> Binary Search, Merge Sort, Quick sort, Multiplication of Large Integers, Convex Hull Problems, Strassen's Matrix Multiplication.										4
VI	<b>Greedy Method</b> Minimum Cost Spanning Trees, Job Sequencing with deadlines, Knapsack Problem, Huffman Trees.										4
<b>Total Hrs : 26</b>											

**List of Laboratory Experiments/ Practicals (if applicable)**

1. Problems based on memory management, array, pointers and structures.
2. Implementation of different operations on linked lists.
3. Implementation of stack and its operations.
4. Implementation of queue and its operations.
5. Applications of stack and queue.
6. Implementation of Tree and graph.
7. Implementation of Tree and Graph traversal.
8. Applications of Tree and Graph.
9. Implementation of searching and sorting techniques.
10. Multiplication of Large Integers.
11. Job Sequencing with deadlines.

**Course Assessment Plan (for total 60 learning hours)**

Assessment No.		Formative Assessment type	Brief Description	Marks	Notional Learning hours	Week
ISE	1	Quiz	Based on concepts studied during class	10	5	3
	2	Assignment	Implementation of stack, queue and linked list	10	15	4
MSE	3	Story building	Creating visual story for certain real time application using appropriate data structure	15	10	6
	4	Assignments/Open Book Exam	Critical scenario based problems on Stack, Queue, linked list	15	10	7
ESE	5	Case Study based problem: implementation and Presentation	Implementation and presentation of a solution for assigned real time problem, including its design using appropriate data structure and its implementation along with outcome	30	15	11
	6	Oral/Viva		20	5	12
<b>Total</b>				<b>100</b>	<b>60 hrs</b>

Programme Outcomes (PO)											
COs	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO1 0	PO1 1
CO 1	3	2				2	2				
CO 2	3	2	2			2	2				
CO 3	3	3	2								
CO 4	2	3	2			2	2				
Module	Module Contents										Hours
I	<b>Basic Thermodynamics:</b> Introduction, thermodynamic state, process, cycle, thermodynamic system, heat, work, internal energy, first law of thermodynamics, application of first law, introduction to heat engine, heat exchangers: types, simple numericals on first law of thermodynamics.										5
II	<b>Thermal Systems:</b> Introduction, pumps, compressors, turbines, refrigeration system, air conditioning systems, two-stroke, four-stroke engines, fuel injection, E-vehicles										5
III	<b>Conventional and Non-Conventional Energy Generation Systems:</b> Introduction, Need and comparison, thermal power plants, hydropower plants, wind power plants, solar, nuclear power plant, energy from domestic and industrial waste.										5
IV	<b>Mechanical Properties of Metals:</b> Concepts of stress, strain and strength, stress-strain curves, fracture - ductile and brittle fracture, thermal, electrical and magnetic properties of materials, composites, advanced materials										5
V	<b>Power Transmission:</b> Need, belt drives, chain drives, and gear drives, (numerical on belt tensions, gear ratio, and velocity ratio), couplings, and their types, clutch and brake, bearings, CVT transmission										5
VI	<b>Manufacturing Processes:</b> Introduction to manufacturing processes - casting process, steps involved in casting processes, and their applications, metal removing processes - lathe, milling and drilling operations, metal joining - arc welding, soldering, brazing and their applications, laser machining, 3-D printing.										5
<b>Total Hrs : 30</b>											
<b>Course Assessment Plan (for total 60 learning hours)</b>											

Assessment No.		Formative Assessment type	Brief Description	Marks	Notional Learning hours	Week
ISE	1	Assignments	Numerical Problem Solving: Focus on First Law of Thermodynamics, Heat, Work, and Internal Energy (Module 1)	10	6	3
	2	Digital Poster Making	Comparative study of Manufacturing Process (Module 6).	10	6	12
MSE	3	Quiz	Based on Module 1, 2 and 3	20	12	6
	4	Group Discussion	Based on Module 1, 2 and 3	10	6	7
ESE	5	Seminar	Based on Module 4 and 5	20	12	10
	6	Viva Exam	Based on Module 6	10	6	12
	7	Open Book Test	Comprehensive assessment covering all Modules (1 to 6)	20	12	13

**26) Modern Built Environment 2      0      1      0      3**

<b>Walchand College of Engineering, Sangli</b> <i>(Government Aided Autonomous Institute)</i>					
<b>AY 2025-26 onwards</b>					
<b>Course Information</b>					
<b>Programme</b>		MDM in Civil Engineering			
<b>Class, Semester</b>		SY B. Tech. Semester IV			
<b>Course Code</b>		7MD276			
<b>Course Name</b>		Modern Built Environment			
<b>Desired Requisites:</b>		Basic Civil Engineering			
<b>Teaching Scheme</b>		<b>Examination Scheme (Marks)</b>			
<b>Lecture</b>	2 Hrs/week	<b>MSE</b>	<b>ISE</b>	<b>ESE</b>	<b>Total</b>
<b>Interaction</b>	1 Hr /week				
<b>Tutorial</b>	-	30	20	50	100
<b>Practical</b>	-	<b>Credits: 3</b>			
<b>Course Objectives</b>					
To introduce students to the fundamentals of site selection, building planning, construction systems, building materials, and building drawings, and to create awareness about smart and green building concepts for safe, efficient, and sustainable built environment practices.					
<b>Course Outcomes (CO)</b>					
<b>CO</b>	<b>Description</b>	<b>Blooms Taxonomy</b>			
		<b>Descriptor</b>	<b>Level</b>		
<b>CO1</b>	Explain the categories of buildings, site selection factors, planning principles, and types of building drawings used in civil engineering practice.	Understanding	II		
<b>CO2</b>	Construct basic residential and public building plans using standard planning principles, symbols, orientation, and relevant scales.	Applying	III		
<b>CO3</b>	Identify and differentiate building components, foundations, construction systems, and common building materials based on their properties and applications.	Analysing	IV		
<b>CO4</b>	Apply basic concepts of smart buildings and green buildings for improving safety, energy efficiency, and sustainability in the built environment.	Applying	III		
<b>CO - PO mapping</b>					

Programme Outcomes (PO)											
COs	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO1 0	PO1 1
CO 1	2	1									
CO 2	2	2			2						1
CO 3	2	2									
CO 4	2	2									1
Module	Module Contents										Hours
I	Site, Building and Building Drawings Categories of buildings, Types of Residential buildings, Site selection, Factors influencing selection of site, guidelines for planning and drawing of buildings, Positions of various building components, types of drawings and relevant scales.										6
II	Principles of Building Planning and concepts Principles of planning, Requirements in different types of buildings, Integrated approach to planning in various aspects like aesthetics, landscape, interior, etc. Guidelines for planning & drawing residential and public buildings.										5
III	Building Components & Construction Systems Sub structure, Foundations, Bearing Capacity of Soils, Types of Shallow and Deep foundations, Conditions for their applications, masonry, Bonds, Doors, Windows, Staircases, Roofs and Floors, Flooring and their Applications										5
IV	Building Materials Types, Engineering properties and Uses of Bricks, Stones, Aggregate, Lime, Cement, Steel, Aluminium, PVC, Glass. Concrete: Ingredients, Preparation, Properties of concrete, Types of concrete and their applications										4
V	Smart Building Concepts & Dimensions Concepts, IoT in buildings, Dimensions, Greenness, Safety: Electronic Access Control, CCTV Surveillance, Fire Safety, Productivity: Building Management System, Building Automation Systems.										5
VI	Concept of Green Buildings Sustainable development concepts, green building initiatives, its origin, characteristics of a green building, green buildings in India, Certification of green buildings, sustainability criteria and life cycle thinking.										5
<b>Total Hrs: 30</b>											
<b>Course Assessment Plan (for total 60 learning hours)</b>											

Assessment No.		Formative Assessment type	Brief Description	Marks	Notional Learning hours	Week
ISE	1	Quiz using Online Tools	Quick assessment of conceptual understanding of planning norms, components, and soil-foundation basics.	10	2	
	2	Design of Experiment	Simple experimental planning for soil testing or material testing to understand construction behaviour.	10	3	
MSE	3	Drawing / Planning Exercise	Preparation of a basic building plan (residential/public) with proper orientation, zoning, and relevant scales. Evaluates practical application of planning and drawing concepts	15	10	
	4	Digital Poster / Technical Sketch & Presentation	prepare and present digital sketches of foundations, building components, staircases, etc	15	10	
ESE	5	Seminar / Case Study Presentation	Presentation on a short case study on smart buildings, green buildings, or modern construction systems. Assesses communication skills and application to real-world scenarios.	25	25	
	6	Report on Lab/Industry Visit -	Report based on site visit to a construction project or material testing laboratory.	25	10	
<b>Total</b>				<b>100</b>	<b>60 hrs</b>

**28. Course Content For Semester VI**

27) Machine Learning using Python    2    0    0    2    3

<b>Walchand College of Engineering, Sangli</b> <i>(Government Aided Autonomous Institute)</i>					
<b>AY 2025 - 26 (Revised)</b>					
<b>Course Information</b>					
<b>Programme</b>		B. Tech. MDM (Artificial Intelligence and Machine Learning)			
<b>Class, Semester</b>		Third Year   Semester VI			
<b>Course Code</b>		7MD359			
<b>Course Name</b>		Machine Learning using Python			
<b>Desired Requisites:</b>		Intermediate Python Programming, Foundational Mathematics			
<b>Teaching Scheme</b>		<b>Examination Scheme (Marks)</b>			
<b>Lecture</b>	2 Hrs/week	<b>MSE</b>	<b>ISE</b>	<b>ESE</b>	<b>Total</b>
<b>Interaction</b>	-				
<b>Tutorial</b>	-	30	20	50	100
<b>Practical</b>	2 Hrs/week	<b>Credits: 3</b>			
<b>Course Objectives</b>					
<ol style="list-style-type: none"> <li>1. To equip students with the mathematical and statistical foundations for ML data preparation.</li> <li>2. To validate Supervised Learning models for engineering prediction problems.</li> <li>3. To develop methods for interpreting Unsupervised Learning results.</li> <li>4. To address ethical issues in deploying ML models for engineering applications.</li> </ol>					
<b>Course Outcomes (CO)</b>					
<b>CO</b>	<b>Description</b>	<b>Blooms Taxonomy</b>			
		<b>Descriptor</b>	<b>Level</b>		
<b>CO1</b>	Understand concepts of foundational mathematics and Mahine learning basics.	<b>Understand</b>	II		
<b>CO2</b>	Apply modelling algorithms in both supervised as well as unsupervised set up for problems such as exploratory data analysis, predictions for classification and regression, and pattern mining in unsupervised set up such as clustering and PCA	<b>Apply</b>	IV		
<b>CO3</b>	Analyse engineering aspects of model using performance metrics, generalization, cost of training and prediction, need for regularisation	<b>Analyse</b>	IV		
<b>CO4</b>	Evaluate ML model suitability and assess ethical implications for deployment in specific engineering applications.	<b>Evaluating</b>	V		

**CO and PO Mapping**

COs	Programme Outcomes (PO)										
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11
CO1	2	1		1	2						1
CO2	2	2	1	2	2						1
CO3	2	2	1	2	2						1
CO4	1	1	2		1	2	2		1		2

Module	Module Contents	Hours
I	<b>Mathematics for ML</b> Linear Algebra basics, Vectors, Matrices, Visualization of Data, Basics of Applied Statistics.	05
II	<b>Introduction to Machine Learning Fundamentals</b> Types of Machine Learning, Core Concepts, Exploratory Data Analysis, Normalization, Outlier Detection in Univariate and Multivariate Data.	05
III	<b>Regression</b> Simple Linear, Multiple Linear Regression, Regression Model Evaluation. Regularisation and Generalization.	05
IV	<b>Classification Techniques</b> Classification Fundamentals and Logistic Regression, Classification Evaluation Metrics, K-Nearest Neighbours (K-NN), Decision Trees and Ensemble Methods.	05
V	<b>Unsupervised Learning</b> Introduction to Unsupervised Learning, K-Means Clustering, Hierarchical Clustering, Principal Component Analysis (PCA).	05
VI	<b>Specialized ML Applications in Engineering</b> ML in Mechanical Engineering, ML in Electrical/Electronics Engineering, ML in Civil Engineering, Model Deployment and Ethics.	05

**Total Hrs : 30**

**List of Laboratory Experiments**

1. Python Fundamentals and EDA
2. Normalization
3. Outlier Detection
4. Multiple Linear Regression
5. Polynomial Regression
6. Logistic Regression
7. Decision Tree for Rule Extraction
8. Random Forest
9. Clustering
10. Domain specific Case Study

**Course Assessment Plan (for total 60 learning hours)**

Assessment No.		Formative Assessment type	Brief Description	Marks	Notional Learning hours	Week
ISE	4	Quiz, Crossword etc. (Online Tools)	Objective, concept-based assessment on Python fundamentals, EDA, Normalization, and Outlier detection.	10	5	3
	16	Testing and Debugging Activity	Hands-on lab session where students debug pre-written code for Supervised Learning models (Regression/Classification) and resolve data pre-processing errors.	10	10	Throughout Semester
MSE	5/32	Seminar / Case Study Presentation	Individual or small group presentation (Seminar) focused on <b>Analysing</b> and comparing the performance, regularization, and validation techniques of Supervised Learning models.	30	15	8
ESE	31 & 33	Mini-Project & Oral/Viva Exam	Comprehensive project (Mini-Project) integrating Unsupervised Learning, domain-specific application, and a final report assessing ethical deployment issues. Assessed via demonstration, report, and <b>Viva Exam</b> (30 marks Project + 20 marks Viva)	50	30	14
<b>Total</b>				<b>100</b>	<b>60 hrs</b>

**28) Data science and Analytics for Smart Cities      2      0      1      0      3**

<b>Walchand College of Engineering, Sangli</b> (Government Aided Autonomous Institute)					
<b>AY 2025-26 onwards</b>					
<b>Course Information</b>					
<b>Programme</b>		MDM in Smart Cities			
<b>Class, Semester</b>		Third Year B. Tech., Sem. VI			
<b>Course Code</b>		7MD368			
<b>Course Name</b>		Data Science and Analytics for Smart Cities			
<b>Desired Requisites:</b>		Basics mathematics, statistics and Python programming			
<b>Teaching Scheme</b>		<b>Examination Scheme (Marks)</b>			
<b>Lecture</b>	2 Hrs/week	<b>MSE</b>	<b>ISE</b>	<b>ESE</b>	<b>Total</b>
<b>Interaction</b>	1 Hr /week				
<b>Tutorial</b>	-	30	20	50	100
<b>Practical</b>		<b>Credits: 3</b>			
<b>Course Objectives</b>					
1. To introduce concepts, functions and services of IoT systems, data handling and cloud computing. 2. To inculcate the concepts of data science, analytics and know-how of the various data processing tools. 3. To acquire the knowledge of data analytics and analysis along with the challenges involved in the implementation. 4. To explore visualization techniques for data analytics.					
<b>Course Outcomes (CO)</b>					
<b>CO</b>	<b>Description</b>	<b>Blooms Taxonomy</b>			
		<b>Descriptor</b>	<b>Level</b>		
<b>CO1</b>	Understand the fundamentals of IoT system and its relevance in real world applications	Understanding	L2		
<b>CO2</b>	Understand various cloud platforms and its data handling techniques in these platforms	Understanding	L3		
<b>CO3</b>	Apply appropriate data analytics tools to manage, present, and interpret complex data, enabling generation of meaningful insights.	Analysing	L4		
<b>CO4</b>	Integrate and apply data analytics concepts to develop innovative solutions for complex problems related to Smart Cities.	Creating	L5		
<b>CO - PO mapping</b>					

Programme Outcomes (PO)														
COs	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO1 0	PO1 1	PO1 2	PSO1	PSO 2
CO 1	1													
CO 2	1	2		2										
CO 3	2	3	3	3	2		2	1	1	1		1	2	
CO 4	2	3	3	3	2		2	1	1	2		1	2	
Module	Module Contents													Hours
I	<b>Fundamentals of IoT, IoT Protocols and cloud platforms:</b> Introduction to IoT Layers and Architecture, Functions of IoT Devices, Sensors, Actuators and interfaces used in IoT system. IoT communication technologies, IoT protocols standards, Introduction to IoT cloud -Edge,Fog and Cloud Computing, Introduction to IoT cloud and its storage models , IoT platforms													5
II	<b>Essentials of Data Science and Analytics:</b> Fundamentals of data science and data security, Understanding the various levels of data, dealing with categorical variable, Introduction to big data and analytics Tools and Various types of Data's, Edge Streaming Analytics, Diff kinds of Data Analytics - Descriptive, Diagnostic, Predictive and Prescriptive.													5
III	<b>Data Visualization Tools and Techniques</b> Introduction to Visualization Tools, Basic and Advanced Visualization Tools, Creating Maps and Visualizing Geospatial Data, Control Flow (Conditionals Loops), Functions and Modules, Python NUMPY, PANDAS, Data visualization using R/Tableau, Python-matplotlib/ seaborn libraries for visualization.													5
IV	<b>Machine Learning (ML) Models</b> ML Fundamentals, Supervised (Linear, Logistic Regression) and Unsupervised Learning, Classification Algorithms (Decision Trees, KNN, Naive Bayes, SVM), Ensemble Methods (Random Forest, Gradient Boosting), Clustering Algorithms (K-means, DBSCAN), Model Evaluation Metrics - Recall, Precision, accuracy etc. Cross-Validation, Hyper parameter Tuning, error, ethical surveillance.													6
V	<b>Citizen-Centric Urban Analytics</b> Urban Analytics and Applications, Implications of data collection and analytics on Buildings, Places, and Transport, Utilities, Services and Governance, Proximity and Diversity													5
VI	<b>Case studies of Data Science Applications for Smart Cities</b> A Case Study of NEOM City, Saudi Arabia, Indian Smart City - Indore, Nagpur, Allahabad and Dehradun. Data analytics for the various use cases in the Smart City													4

**Course Assessment Plan (for total 60 learning hours)**

Assessment No.		Formative Assessment type	Brief Description	Marks	Notional Learning hours	Week
ISE	1	Quiz using Online Tools	Quick assessment of conceptual understanding of IoT system basics.	10	2	
	2	Design of Experiment	Simple experiments for understanding IoT platforms.	10	3	
MSE	3	Online Coding Challenge (Hacker Rank)	Assignments on data analytics using Python/R	15	10	
	4	Certification small course of 10-12hr duration on platform like coursera /Udemy/NPTEL	Based on ML , Python, R and cloud analytics	25	25	
ESE	5	Case Study Presentation	Presentation on a short project/prototype idea related to smart cities	15	10	
	6	Prototype Making	Prototype implementation and demonstration with Report submission	25	15	
<b>Total</b>				<b>100</b>	<b>60 hrs</b>

<b>Desired Requisites:</b>	Introduction to Electric Vehicles, Drive Systems in Electric Vehicles				
<b>Teaching Scheme</b>		<b>Examination Scheme (Marks)</b>			
<b>Lecture</b>	2 Hrs/week	<b>MSE</b>	<b>ISE</b>	<b>ESE</b>	<b>Total</b>
<b>Interaction</b>	-				
<b>Tutorial</b>	-	30	20	50	100
<b>Practical</b>	2 Hrs/week	<b>Credits: 3</b>			
<b>Course Objectives</b>					
<ol style="list-style-type: none"> <li>To provide students with a comprehensive understanding of embedded system applications in automotive engineering, emphasizing the design, development, and integration of embedded solutions for vehicle control, safety, and infotainment.</li> <li>To provide the fundamental principles, standards, and protocols governing communication within EV systems</li> </ol>					
<b>Course Outcomes (CO)</b>					
<b>CO</b>	<b>Description</b>	<b>Blooms Taxonomy</b>			
		<b>Descriptor</b>	<b>Level</b>		
<b>CO1</b>	Discuss the practical skills in designing, programming, and testing embedded systems for vehicle control.	II	Understanding		
<b>CO2</b>	Describe various sensors and transducers used in electric vehicles.	II	Understanding		
<b>CO3</b>	Explore the standards and protocols for EV communication.	III	Applying		
<b>CO4</b>	Analyse case studies and real-world implementations of EV communication protocols.	IV	Analysing		
<b>CO - PO mapping</b>					

Programme Outcomes (PO)											
COs	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO11
CO 1	3										
CO 2	3	3			2						1
CO 3	3										
CO 4	3	3	2		2	3		2	2		

  

Module	Module Contents	Hours
I	<b>Introduction to Embedded Systems</b> Overview of embedded systems and their role in automotive engineering, Architecture of microcontrollers used in automotive applications, architecture, Memory Organization, Internal Peripheral Modules: Digital Input Outputs, ADC, Timer/Counters, Interrupts, UART, PWM Concepts, External Interfaces: LEDs, Switches, , Relay and Motor Driver, DSP Controllers used in EV	5
II	<b>Advanced sensors technologies and their applications in EV</b> Opto-electronic sensors, Fiber optic sensor, Magnetic sensors, Digital transducers, Ultrasonic sensors, Micro sensors, Bio sensors, Smart sensor systems and applications, General architecture of a smart sensor - Self calibration, Wireless sensors, Vibration, position measurement in machine tools	5
III	<b>Fundamentals of CAN (Controller Area Network) Protocol</b> Overview of electric vehicle architecture, Importance of communication protocols in EVs, Evolution of EV communication standards, Controller Area Network (CAN), CAN protocol layers and message structure, Diagnostics and error handling in CAN	5
IV	<b>EV Charging Communication Protocols</b> Introduction to EV charging infrastructure, OCPP (Open Charge Point Protocol), ISO 15118 (Plug and Charge), Vehicle-to-Grid (V2G) Communication: Concept and significance of V2G communication, Standards and protocols for V2G communication, Applications and challenges of V2G integration.	5
V	<b>Vehicle-to-Vehicle (V2V) and Vehicle-to-Infrastructure (V2I) Communication</b> Overview of V2V communication in electric vehicles, IEEE 802.11p (Wireless Access for Vehicular, Environments - WAVE), Safety and cooperative driving applications of V2V, Role of V2I communication in smart mobility, DSRC (Dedicated Short Range Communication), Integration of V2I with traffic management systems.	5

VI	<b>Emerging Technologies and Future Trends in EV</b> Analysis of real-world implementations of EV communication protocols, Case studies of successful EV communication deployments, Hands on exercises and demonstrations, Threats and vulnerabilities in EV communication, Security protocols and measures for protecting EV systems, Privacy concerns and data protection regulations	5
----	--	---

**Total Hrs : 30**

**List of Laboratory Experiments/ Practicals (if applicable)**

1. Simulation of Automotive Sensor Signal Conditioning
2. PWM Generation and Motor Speed Control (DC/BLDC Motor)
3. Modeling and Simulation of CAN Bus Communication
4. Cruise Control System Simulation using PID Control
5. Electronic Throttle Control (ETC) System Simulation
6. Battery Management System (BMS) Simulation for Electric Vehicles
7. Modeling Automotive Lighting Control System
8. EV/Hybrid Vehicle Powertrain Simulation

**Course Assessment Plan (for total 60 learning hours)**

Assessment No.		Formative Assessment type	Brief Description	Marks	Notional Learning hours	Week
ISE	1	Design Thinking Exercises	Ideation challenges	20	10	3
MSE	2	Short Quizzes / Unit Tests	Concept-based MCQs	30	5	9
ESE	3	Mini-Project	Small application-oriented projects which includes design, coding, testing, and report preparation	30	15	13
	4	Case Study Presentation	Industry-oriented problem statements	10	10	11
	5	Oral/Viva Exam	Concept understanding	10	10	13
<b>Total</b>				<b>100</b>	<b>60 hrs</b>

Programme Outcomes (PO)											
COs	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO1 0	PO1 1
CO 1	3										
CO 2	3	3			2						1
CO 3	3										
CO 4	3	3	2		2	3					

  

Module	Module Contents	Hours
I	<b>Foundations of Computer Vision &amp; Robotics</b> Evolution of robotics and role of perception, Vision vs. other sensing modalities (LiDAR, RADAR, IMU), Computer vision pipeline for robotic systems: perception → understanding → action, Real-world application domains: autonomous vehicles, drones, industrial robots, medical robots, service robots, agriculture robots	5
II	<b>Image Processing and Feature Extraction</b> Image filtering & enhancement: Smoothing, sharpening, edge detection, 2D convolution, kernels, Color models (RGB, HSV, YCbCr), Feature detection- Harris Corner, FAST, ORB, SIFT/SURF concepts, Feature description & matching, Morphological operations for robotics tasks, Hands-on with OpenCV fundamentals	5
III	<b>3D Vision, Geometry, and Robot Perception</b> Camera calibration & distortion models, Stereo vision- Epipolar geometry, Depth estimation, Structure-from-Motion (SfM) basics, Visual Odometry (VO) fundamentals, SLAM overview (Mono, Stereo, RGB-D), Point cloud processing (PCL basics), Robot localization using vision, Applications: mapping, obstacle detection, navigation	5
IV	<b>Machine Learning &amp; Deep Learning for Vision in Robotics</b> Traditional ML for vision: SVM, kNN, PCA, CNNs for robotic perception- Image classification, Feature extraction with deep models, Object Detection (YOLO, SSD, Faster R-CNN), Semantic & Instance Segmentation (U-Net, Mask R-CNN), Depth estimation using deep networks, Vision transformers (ViT) for robotics, Real-time inference challenges on robotics hardware (GPU/TPU/Edge devices)	5

V	<b>Vision-Based Robot Control &amp; Applications</b> Visual Servoing (IBVS, PBVS), Object tracking for robotic manipulation- Kalman filter, optical flow (Lucas-Kanade), Deep SORT, Grasp detection & pose estimation, Human-robot interaction using vision, Vision-based SLAM integrations in ROS, Simultaneous perception & planning, Applications: pick-and-place, warehouse robots, drone navigation, automated inspection	5
VI	<b>Implementation, Integration, and Emerging Trends</b> Vision system architecture for robots, Embedded vision systems (Nvidia Jetson, Raspberry Pi, Robotics CPUs), ROS/ROS2-based computer vision workflow Integration with robotic arms/mobile robots, Dataset creation, annotation tools, evaluation metrics, Ethics, safety & responsible AI in robotics	5

**31) Financial Modelling 2 0 1 0 3**

Walchand College of Engineering, Sangli (Government Aided Autonomous Institute)					
AY 2025-26 onwards					
Course Information					
<b>Programme</b>		B. Tech. (MDM - FinTech)			
<b>Class, Semester</b>		Third Year B. Tech. SEM-VI			
<b>Course Code</b>		7MD370			
<b>Course Name</b>		Financial Modelling			
<b>Desired Requisites:</b>					
Teaching Scheme		Examination Scheme (Marks)			
<b>Lecture</b>	2 Hrs/week	<b>MSE</b>	<b>ISE</b>	<b>ESE</b>	<b>Total</b>
<b>Interaction</b>	1 Hr /week				
<b>Tutorial</b>	-	30	20	50	100
<b>Practical</b>	-	<b>Credits: 3</b>			
Course Objectives					
<ol style="list-style-type: none"> <li><b>To develop proficiency in Advanced Excel and Python tools</b> for financial modeling, data analysis, dashboards, and automation in finance-related decision-making.</li> <li><b>To build strong foundations in financial mathematics and statistics</b>, enabling learners to apply time value of money, risk analysis, and data interpretation in real-world financial problems.</li> <li><b>To enable learners to construct integrated financial models</b>, including project cash flows, working capital, valuation models, and financial statement linkages.</li> <li><b>To equip learners with practical FinTech and entrepreneurial finance skills</b>, including SaaS metrics, startup valuation, cap table modeling, funding strategies, and exit analysis</li> </ol>					
Course Outcomes (CO)					
CO	Description	Blooms Taxonomy			
		Descriptor	Level		
CO1	Apply advanced Excel functions (Goal Seek, Data Tables, Lookup, Index-Match, logical functions, Pivot Tables, dashboards) and Python add-ins to analyze and visualize financial data.	Understanding	2		
CO2	Analyze financial problems using concepts of time value of money, compounding, NPV, discount rates, and statistical measures to interpret financial and stock market data.	Analysing	4		

<b>CO3</b>	Construct and integrate financial models linking income statement, balance sheet, and cash flow statements, and evaluate firm value using DCF, WACC, and free cash flow approaches..	Evaluating	5
<b>CO4</b>	Design startup financial models including SaaS metrics (CAC, LTV, MRR, ARR), cap table and dilution analysis, funding rounds, and exit strategies for entrepreneurial decision-making.	Creating	6

**CO - PO mapping**

Programme Outcomes (PO)											
COs	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO10	PO11
<b>CO 1</b>	3	2				2	2				
<b>CO 2</b>	3	2	2			2	2				
<b>CO 3</b>	3	3	2								
<b>CO 4</b>	2	3	2			2	2				

Module	Module Contents	Hours
I	<b>Advanced Excel for Financial Modeling</b> Goal Seek Data Tables Scenario Manager, Introduction to the look function category, H look application case, Index function and Match function to counter, Logical operator in excel and its use in financial Modeling, Sum if functions, Pivot, Slicer and dashboard using excel, Python add-in for Excel	4
II	<b>Mathematics and statistics for Finance</b> Introduction to Time value of money and the concept of compounding, present value, Future Value, Rate, Nper, Beg and End calculations, NPV, Discount rate calculation, Introduction to central tendency and application using data, Distribution charts and inferences.	4
III	<b>Integrated Financial Modeling</b> Working capital Project cash flows based, on historical metrics Create debt, equity, and working capital supporting schedules, Review how financial statements tie together and balance the model, Integrate the income statement, balance sheet, and cash flow statement in Excel, Calculate unlevered free cash flow from the integrated model Discount cash flows using the WACC Derive a share price from total company value	7
IV	Stock Data Analysis and Equity Valuation Stocks Data Analysis, Asset Allocation and Statistical Data Analysis, Predict Future Stock Prices Using Machine/Deep Learning, Perform Sentiment Analysis on Stocks Data Free cash flow calculations, estimation of the cost of equity, calculation of weighted average cost of the capital, valuation using DCF	5

V	<b>Fintech for Entrepreneur I:</b> SaaS/Subscription Revenue Modeling: Modeling key FinTech metrics: Customer Acquisition Cost (CAC), Lifetime Value (LTV), Churn Rate, Monthly Recurring Revenue (MRR), Annual Recurring Revenue (ARR). Building a Unit Economics Model in Excel. Early-Stage Valuation Methods.	5
VI	<b>Fintech for Entrepreneur II:</b> Cap Table and Dilution Modeling: Calculating dilution across different funding rounds (Seed, Series A). Financing Round Modeling, Waterfall Analysis of exit scenarios , exit strategies for startups, different ways for raising funds, marketing strategies and business plan.	5

**Total Hrs : 30**

**Course Assessment Plan (for total 60 learning hours)**

Assessment No.	Formative Assessment type	Brief Description	Marks	Notional Learning hours	Week
ISE	1	Assignment + Practice Problems	10	6 hours	Week 3
	2	Mini-Task	10	6 hours	Week 6
MSE	3	MCQ Exam	30	12 hours	Week 8
	4	Case-Based presentation	20	10	12
ESE	5	Exam(Online, MCQ based)	30	10 hours	Week 16
<b>Total</b>			<b>100</b>	<b>60 hrs</b>
